

# WILDLIFE WATCH

## GET TO KNOW AND HELP CONSERVE LOCAL WILDLIFE

By recording wildlife observations in your own backyard or in public open space (such as bushland reserves, parklands or streetscapes), you will help to build knowledge about what lives in the area and importantly, make this data available for use in biodiversity management. When we know what species live where, their habitats can be better protected. It's also lots of fun, exploring and discovering! Find things on your own, or form a local group with friends.

### How can I enter a sighting?

- > scan the QR code below and simply 'Add a record'. This takes you to 'Wildlife Watch NSC', our Citizen Science project hosted by the Atlas of Living Australia (ALA)
  - or
  - > download the BioCollect app. and find the Wildlife Watch NSC project. Complete the fields and add your first record to the project.
- Note: you will be prompted to create an account with the ALA

For further information about the Wildlife Watch program, contact the Bushland Project Officer on 9936 8100 or email [council@northsydney.nsw.gov.au](mailto:council@northsydney.nsw.gov.au)
