1 Executive Summary

This Taxi and Ride Sourcing Strategy and Action Plan has been developed by Council's Traffic and Transport Operations business unit to review the existing taxi zones and consider what are the trip attractors that generate demand for taxis and ride sourcing in the North Sydney LGA.

The Strategy and Action Plan also identifies opportunities to increase taxi spaces and introduce new spaces for ride sourcing in high demand areas, while consolidating taxi zones in lower demand areas. The strategy maps land uses which are likely to generate the highest demand for taxi and ride sharing (Figure 1) and identifies the existing taxi ranks in the North Sydney LGA (Figure 2). Drop-off and pick-up statistics for the North Sydney LGA from one major ride sourcing company was also compared and produced similar findings to Council's analysis

In addition, data for the North Sydney LGA provided by NSW Taxi Council in August 2019, revealed that North Sydney CBD had the highest taxi pickups followed by Crows Nest and Neutral Bay, which is consistent with the above findings.

Investigations and observations were undertaken at each of the 14 existing Taxi Zones in the North Sydney LGA to determine utilisation and peak demand for each Taxi Zone. The Strategy uses the relative turnover rates and findings from these investigations to recommend an Action Plan to manage and extend the provision of Taxi Zones and ride share parking facilities based on demand.

The key strategic instrument used to increase the ability for taxis, ride sourcing operators and all other road users to pick up and drop off passengers is to simply change the existing parking restriction in areas of high demand.

This is achieved by introducing "No Parking" restriction outside the existing "Part time Loading Zone" operating hours. Additionally, changing the "Full time Loading Zones" to "Part time Loading Zones" and introduce "No Parking" restriction outside the Loading zone operating hours.

This allows for more opportunities for taxis and ride sourcing operators and all road users to pick up and drop off passengers.

These proposed changes are permissible under the current legislative provisions for taxis and ride sourcing services and will allow taxis and ride sourcing vehicles to stop legally to pick up and drop off without attracting an infringement.

Modifications to the number of zones and/or spaces for drop-off and pick-up purposes for taxi and ride sourcing within the North Sydney LGA will be subject to the current and forecast future demands around the North Sydney LGA.

A set of criteria has been established for future requests for additional taxi/ride sourcing ranks/spaces within the North Sydney LGA to ensure a systematic and consistent approach is achieved.

2 Definition

Ride sourcing, sometimes referred to as ride-sharing, is an ongoing arrangement where a driver makes a car available for public hire for passengers, a passenger uses a third-party digital platform, such as a website or an app to request a ride and the driver uses the car to transport the passenger in return for payment. For the purpose of this strategy the term “ride sourcing” is used.

3 Key Objectives

The key objectives of this strategy are to:

- Locate and map the existing taxi ranks within the North Sydney LGA and assess how much these ranks are utilised;
- Locate high demand drop off / pick up areas for ride sourcing within the North Sydney LGA;
- Review current legislative provisions for taxi and ride sourcing operators.
- Increase the drop-off and pick-up spaces for taxi and ride sourcing within the North Sydney LGA by changing existing parking restrictions.
- Establish criteria for future request for additional taxi/ride sourcing ranks/spaces within the North Sydney LGA.

Strategic Planning Context

The North Sydney Transport Strategy (2017) recognised ride sourcing as an emerging trend which has the potential to significantly change the number of distance journeys and/or the way that individuals travel.

In addition, the North Sydney Community Strategic Plan 2018-2028 objectives include promoting sustainable transport options, prioritising walking and cycling and minimising reliance on motor vehicles (Direction 2).

“The way people move around North Sydney will have improved. North Sydney has integrated transport system that make it easy to get to and around the local government area. North Sydney has a wide choice of transport. People can cycle, walk, take public transport or drive a vehicle. Public transport is efficient offering a good alternative to cars. Car ownership will decrease as more people take up car share options.”

North Sydney Transport Strategy 2017, Direction 2 Our Built infrastructure

The following outcomes and strategies are stated in the North Sydney Community Strategic Plan 2018-2028.

2.3 Sustainable transport is encouraged:

2.3.1 Facilitate, advocate and provide opportunities for improved public transport use, alternative modes of transport and end of trip facilities

2.3.3 Incentivise use of public transport and lower impact vehicles

2.3.6 Examine new forms of travel, including driverless cars

2.4 Improved traffic and parking management

2.4.1 Plan, design, investigate and manage traffic to minimise its adverse impacts on people, car commuters and through traffic

2.4.3 Provide integrated and efficient on-street and off-street parking options in residential and commercial areas

This strategy and action plan have been developed to review the current provision of taxi ranks within the North Sydney LGA and identify gaps between the provision and demand for taxi and ride sourcing parking facilities. This will assist Council to determine the most suitable locations for taxi zones and parking facilities for taxi and ride share users, whilst balancing the need for other types of parking from other road users.

4 Current Taxi and ride sourcing demand and utilisation

Taxis and ride sourcing are typically used for point to point transport. The venues that generate the most demand for taxis and ride sourcing include, but are not limited to, business and commercial zones, shopping centers, train stations, ferry wharf, bus interchanges, hotels and other types of accommodations, bars/pubs, hospitals and medical centers.

These trip attractions in the North Sydney LGA were identified and plotted on the map in Figure1 and can be divided into seven (7) high demand zones.

4.1 Existing taxi ranks in North Sydney LGA

Currently there are 14 formalised taxi zones within the North Sydney LGA with approximately 49 spaces. These taxi zones are located in the areas shown in Table 1 and Figure 2.

Locality	No. of taxi zones	Number of spaces
Cremorne	1	5
Crow's Nest	3	8
Milsons Point Train Station	1	5
Neutral Bay	3	10
North Sydney CBD	3	7
North Sydney Train Station	3	14
Total	14	49

Table 1: Taxi Zone locations

Figure 2 Map of existing 14 x taxi ranks Within the North Sydney LGA. These ranks currently comprise of 49 spaces

4.2 Utilising existing taxi ranks within the North Sydney LGA

In order to determine the turnover rate of the existing taxi ranks within the North Sydney LGA, cameras were installed at nine busy taxi ranks for a period of 24 hours. Other less busy taxi ranks were visited for 15 minutes on a weekday by Council's Traffic Engineer to determine the turnover rate.

Most taxi ranks operate 24 hours and others are designed to cater for the location specific conditions. Taxi ranks closer to the business areas may have an operational time during daytime on weekdays while others close to the restaurants and night life venues operate in the evenings and/or weekends.

For the purpose of this strategy and action plan, each taxi rank was reviewed based on its operational time and the peak time usage during day or night. Tables and outline the estimated peak period for taxi and ride sourcing around different venues and existing taxi zones.

Venue	Typical operational hours	Expected taxi/ride sourcing peak period
Shops	8am-5pm	2:30pm-5pm
Train Station	24 hours	7am-9am and 4pm-9pm
Restaurants	6pm – 12am	6pm – 12am
Night Life venues	7pm – 5am	7pm – 5am
Medical Centres	8am-5pm	8am-5pm
Business and offices	7am-6pm	7am-6pm
Visitor's Accommodation	24 hours	7am-10pm

Table 2: Venues, operational hours and expected taxi/ride sourcing peak period

	Shops	Train Station	Restaurants	Night Life venues	Medical Centres	Business and offices	Visitor's Accomodation	Typical operational hours
Alexander Street	8am-5pm		6pm – 12am					8am-12am
Ben Boyd Road	8am-5pm		6pm – 12am	7pm – 5am	8am-5pm			8am-12am
Berry Street						7am-6pm		7am-6pm
Blue Street		24 Hours				7am-6pm		24 Hours
Blue Street fronting Harbourview Hotel (North)		24 Hours				7am-6pm	7am-6pm	24 Hours
Blue Street fronting Harbourview Hotel (South)		24 Hours				7am-6pm	7am-6pm	24 Hours
Burlington Street	8am-5pm		6pm – 12am					8am-12am
Cabramatta Road	8am-5pm				8am-5pm		7am-6pm	8am-6pm

Rangers Road (Location 1)	8am-5pm		6pm – 12am	7pm – 5am	8am-5pm			8am-12am
Rangers Road (Location 2)	8am-5pm		6pm – 12am	7pm – 5am	8am-5pm			8am-12am
Willoughby Road			6pm – 12am	7pm – 5am				6pm-5am

Table 3: Existing Taxi zone locations vs land use typical operational hours

4.2.1 Cremorne

- The existing Taxi Rank in **Cabramatta Road** is located within the proximity of shops and medical centres. It is operational 24 hours a day and has a total of 5 spaces. Site observations on a weekday at around midday, revealed that taxi turnover rate at this rank was low.

4.2.2 Crow's Nest

- The existing taxi rank in **Alexander Street** is located within the proximity of shops and restaurants. It is operational 24 hours a day and has a total of 3 spaces. Site observations on a weekday at around midday, revealed that taxi turnover rate at this rank was low.
- The existing taxi rank in **Burlington Street** is located within the proximity of shops and restaurants. It is operational 24 hours a day and has a total of 2 spaces. Site observations on a weekday at around midday, revealed that taxi turnover rate at this rank was low.
- The existing taxi rank in **Willoughby Road** is located within the proximity of restaurants and other night life venues. It is operational from 10pm to 7am seven days a week and has a total of 3 spaces. Reviewing the video footage at this taxi rank revealed that between the peak hours of 2am and 4am, taxis, occasionally stopped at the taxi rank on the western side of Willoughby Rd or at the angled parking spaces on the eastern side of Willoughby Rd. It was also revealed that taxi and ride sourcing generally stop at the middle of the road to drop off or pick up passengers. Their preference was to stop/park at the angled parking spaces across the road from the Taxi Zone if waiting was necessary.

Figure 3 Willoughby Road, Crows Nest - Taxi Rank Turnover July 2019

4.2.3 Milsons Point Train Station

- The existing taxi rank in **Ennis Road** is located close to the Milsons Point Train Station, shops and restaurants. It is operational 24hr a day and has a total of 5

spaces. Reviewing the video footage at this taxi rank at the morning and evening peak hours revealed that taxi turnover rate at this rank was high.

Figure 4 Ennis Road, Milsons Point - Taxi Rank Turnover July 2019

4.2.4 Neutral Bay

- The existing taxi rank in **Ben Boyd Road** is located close to the shops, restaurants and other night life venues. It is operational from 6:30 pm to 6:30 am weekdays and full time on weekend and has a total of 3 spaces. Reviewing the video footage at this taxi rank revealed that taxi turnover rate at this rank was high. Additionally, it was noted that taxis utilised the existing Loading zone close to the intersection for ranking.

Figure 5 Ben Boyd Road, Neutral Bay - Taxi Rank Turnover July 2019

- The existing taxi rank in **Rangers Road (Location 1, part time taxi zone)** is located close to the shops and restaurants and other night life venues. It is operational

from 10am-5:45pm and 11:45pm-5:45am every day and has a total of 5 spaces. Reviewing the video footage at this taxi rank revealed that the taxi zone was rarely used with a very low turnover.

Figure 6 Rangers Road, Cremorne - Part-Time Taxi Rank Turnover July 2019

- The existing taxi rank in **Rangers Road (Location 2, full time taxi zone)** is located close to the shops and restaurants and other night life venues. It is operational 24 hrs and has a total of 2 spaces. Reviewing the video footage at this taxi rank revealed that the taxi zone was rarely used with a very low turnover.

Figure 7 Rangers Road, Cremorne - Full-time Taxi Rank Turnover July 2019

4.2.5 North Sydney CBD

- The existing taxi rank in **Berry Street** is located close to business and office buildings. It is operational 3pm-10am Mon-Sat and 7pm-10am on weekends and

has a total of 4 spaces. Reviewing the video footage at this taxi rank revealed that turnover rate at this rank was high.

Figure 8 Berry Street, North Sydney - Taxi Rank Turnover July 2019

- The existing taxi rank in **McLaren Street** is located close to the business and office buildings. It is operational 24 hours a day every day and has a total of 2 spaces. Reviewing the video footage at this taxi rank revealed that turnover rate at this rank was high.

Figure 9 McLaren Street, North Sydney - Taxi Rank Turnover July 2019

- The existing taxi rank in **Miller Street** is located close to the business and office buildings. It is operational 24 hours a day every day except during clearways

from 6am to 10am on weekdays and has a total of 1 space. Site observation on a weekday at around midday, revealed that turnover rate at this rank was low.

4.2.6 North Sydney Train Station

- The existing taxi ranks in **Blue Street** and **fronting Harbourview Hotel (South side)** are located close to North Sydney Station, business and office buildings. They are operational 24 hours and have a combined total of 8 spaces. These taxi ranks operate in loop. Reviewing the video footage at these taxi ranks revealed that the combined turnover rate at these ranks were high.

Figure 10 Blue Street, North Sydney - Taxi Rank Turnover (south side) July 2019

- The existing taxi rank in **Blue Street fronting Harbourview Hotel (North side)** is located close to North Sydney Station, business and office buildings. It is operational 7am-6pm on weekdays and has a total of 6 spaces. Reviewing the video footage at this taxi rank revealed that turnover rate at this rank was high.

Figure 11 Blue Street, North Sydney - Taxi Rank Turnover (north side) July 2019

4.2.7 Summary and findings

A summary of the investigations of existing taxi zones is provided in Table 4. For the purposes of this strategy and action plan, the average peak period turnover was calculated as the average turnover rate, per hour, per bay during the peak period.

Each location was then allocated a priority for investigation based on current turnover and demand. In this regard, turnover greater than or equal to 5 (indicating high utilisation) and turnover less than or equal to 2.5 (indicating low utilisation) is allocated priority 1. This will allow review of both high and low turnover taxi zones for possible extension or reduction of taxi spaces based on their relative turnover.

Other sites with peak period average turnover rate per hour per bay between 2.5 and 5 are allocated priority 2 for further investigation.

Note:

Priorities in both Blue Street and Willoughby Road taxi ranks were calculated slightly different to other ranks.

Blue Street taxi ranks have a combined peak time average turnover rate of 2.93 taxis per hour per bay. These taxi ranks (total of 14 spaces) operate in a loop and video footage at these locations revealed that they work smoothly together, hence the lower priority.

Willoughby Road has a peak time average turnover rate of 1 taxi per hour per bay. Reviewing the video footage revealed that taxis tend to use the angled parking across the road which has a higher peak time average turnover rate of 2.57 taxis per hour per bay compared to the taxi rank. Therefore, this rank requires a review under a higher priority than 2.

The result of this investigation is provided in tabular format below.

No.	Locality	Address	Existing Restriction	Operation	Type of Survey	observation/ Review time	Peak Time	Total Bays	Peak time Avg Turnover /hr	Peak time Avg Turnover Rate / hr /Bay	Peak Priority	Notes
1	Cremorne	Cabramatta Road	Taxi Zone	24 hr	Site visit	1 Hour mid-day	-	5	8	1.60	1	
2	Crows Nest	Alexander Street	Taxi zone	24 hr	Site visit	1 Hour mid-day	-	3	8	2.67	2

Table 4: Existing taxi ranks usage and turnover (Continued)

The average peak time turnover for taxis per hour across all 14 taxi zones is approximately 11.9.

Seven locations had turnover greater 5 or less than 2.5 (priority 1). These were located in Cremorne, Crows Nest, Neutral Bay and the North Sydney CBD.

Seven locations had turnover greater than 2.5 or less than 5 (priority 2). These were located in sections of Crows Nest, Milsons Point Train Station, part of the North Sydney CBD and North Sydney Train Station.

Based on seven-day survey data within the North Sydney Council LGA, between 10th and 16th August 2019 by NSW Taxi Council, it was revealed that North Sydney CBD had the highest taxi pick-ups, followed by Crows Nest and Neutral Bay. This data is also in line with the high demand area for taxis and ride sourcing identified in Section 4.

The NSW Taxi Council has also made recommendations based on customer usage engendering No Stopping violations for additional taxi zones within the North Sydney LGA. These locations are:

1. Corner of Falcon St and Pacific Highway outside the Crow's Nest Hotel
2. Berry St, North Sydney
3. Blue St, North Sydney

There are existing taxi zones at or close to the above locations which will be investigated further as part of implementation process.

Figure 12: Taxi demand per locality (Source: NSW Taxi Council)

5 Legislation and Enforcement

5.1 Taxis

The NSW Road Rules 2014 allow a taxi driver to pull up to the kerb to pick up or set down a passenger in any legal parking space as well as a clearway, any driveway and any loading zone. Taxi drivers are not permitted to pick up passengers in No Stopping zones, within 10 metres of an intersection or in a bus zone.

Most issues with taxis in North Sydney area are not related to ranks or ranking but with potential customers hailing for taxis where there is nowhere for the taxi to stop other than double park (which causes an obstruction to all vehicles behind) or in a No Stopping zone where it creates a danger for other drivers and pedestrians by reducing the line of sight to an unacceptable level.

A particular issue in North Sydney is the willingness of taxi drivers to double park, stop in No Stopping zones and anywhere they can pick up a fare. These actions, particularly in the high traffic/high pedestrian environment of North Sydney, create an unsafe situation.

Illegal taxi ranking prevents motorists using parking bays provided for private purposes as well as loading zones for approved loading operations. NSW Police and Transport for NSW Inspectors are authorised to issue on-the-spot penalty notices where illegal taxi ranking takes place, however Council Rangers are not authorised to issue penalties for this offence.

Taxis have been issued with infringements in the past years for disobeying the Road Rules by North Sydney Council's parking officers. Infringements by taxis make up 3.31% in 2016-2017, 1.42% in 2017-2018 and 2.23% in 2018-2019 of all parking infringements issued by Council. Statistics for ride sourcing vehicles are not available due to the way infringements are recorded.

The infringement records in the past three years revealed that most taxi infringements are issued around Crows Nest and North Sydney CBD taxi ranks.

Figure 13 Taxi infringements issued in the North Sydney LGA (2016-2019)

Council records for a period of three years from 2016 to 2019 also reveal that taxi drivers have been issued with infringement notices at the following locations.

- **Falcon Street:** (total of 1579 infringements)
- **Berry Street:** (total of 636 infringements)
- **Pacific Highway:** (total of 380 infringements)
- **Walker Street:** (total of 242 infringements)
- **Miller Street:** (total of 158 infringements)

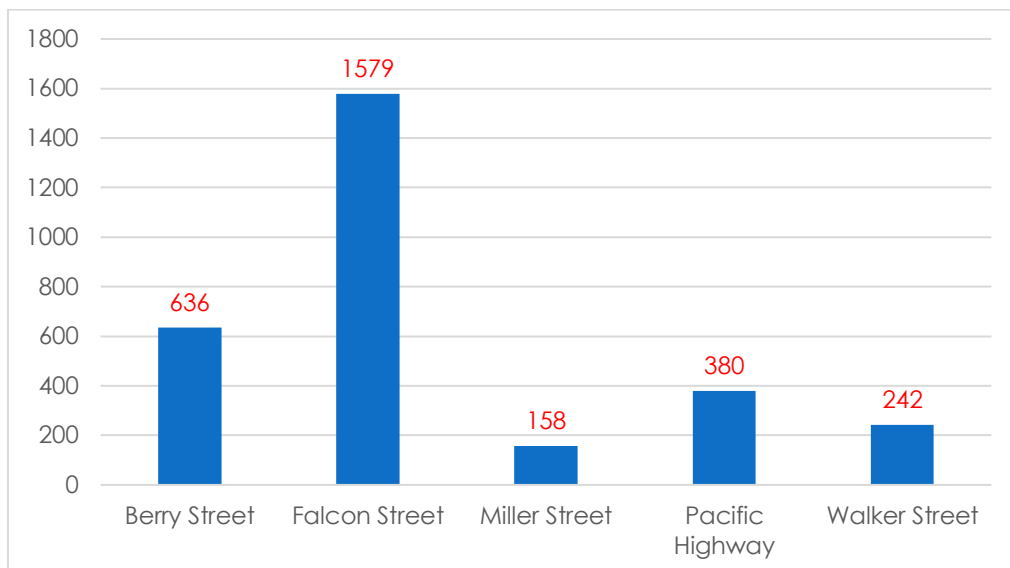

Figure 14 Taxi infringements by street of offence (2016-2019)

It was also revealed that most of infringement notices issued were related to disobeying the No Stopping restrictions, stop in bus zone and stop on side of road with yellow edge line.

- **Disobey No stopping sign:** (total of 2485 infringements)
- **Stop in bus zone (not clearway or transit/bus lane):** (total of 333 infringements)
- **Stop at side of road with continuous yellow edge line:** (total of 281 infringements)

Figure 15 Taxi infringements by type of offence (2016-2019)

5.2 Ride sourcing groups

Currently there are nine ride sourcing companies operating in NSW. These companies are Blacklane, Bridji, Go Catch, Jayride, Ola, Shebah, Talixo, Toodooloo and Uber

Ride sourcing services have been operating in Australia for approximately 6 years. Statistics from one ride sourcing company revealed that the drop off/pick up concentration in the North Sydney LGA is similar to the high demand area for taxis and ride sourcing identified in Figure 1.

Unlike taxi industry, the legislation does not allow any exemptions for ride sourcing drivers to pull up to the kerb to pick up or set down a passenger in a clearway or any taxi zone. Also, ride sourcing vehicles not permitted to pick up passengers in No Stopping zones, within 10 metres of an intersection or in a bus zone.

Ride sourcing drivers are strictly required to obey the Road Rules and pick up/drop off passengers at any legal parking spaces. Occasionally and for large events, ride sourcing vehicles are provided a dedicated area to drop off/pick up passenger under supervision of event organisers.

5.3 Summary of legislative provisions for taxi and ride sourcing.

The legislative provision for taxi and ride sourcing services in different parking zones area summarised in Table 5

Type of Zone	Stopping / Parking Permitted		Road Rule 2014 Clause
	Taxis	Rideshares	
Bus Zone	No	No	183
Clearway	Yes - the driver is dropping off, or picking up, passengers	No	176
Clearway (No Stopping) Line	Yes - If the driver of a taxi dropping off, or picking up, passengers	No	176-1
Disabled Parking spaces	No	No	203
Double Parking	No	No	189
Loading Zone	Yes - if the driver is driving a vehicle that is dropping off, or picking up, passengers	Yes - if the driver is driving a vehicle that is dropping off, or picking up, passengers	179
Mail Zone	No	No	186
Metered Parking bays	Yes - within the times indicated on the sign, stay within the permitted time limit and pay the relevant fees for the duration of stay	Yes - within the times indicated on the sign, stay within the permitted time limit and pay the relevant fees for the duration of stay	207
Motorbike Parking spaces	No	No	202
No Parking	Yes - the driver is dropping off, or picking up, passengers for maximum 2 minutes and driver must stay 3 metres from the closest point of the vehicle	Yes - the driver is dropping off, or picking up, passengers for maximum 2 minutes and driver must stay 3 metres from the closest point of the vehicle	168
No Stopping	No	No	167
on or across Driveway	Yes - if the driver is dropping off, or picking up, passengers	Yes - if the driver is dropping off, or picking up, passengers	198
Shared Zone	Yes - if the driver is dropping off, or picking up, passengers or goods	Yes - if the driver is dropping off, or picking up, passengers or goods	188
Taxi Zone	Yes	No	182
Timed Parking bays	Yes - within the times indicated on the sign and stay within the permitted time limit	Yes - within the times indicated on the sign and stay within the permitted time limit	205, 205-1
Truck Zone	Yes - if a motor vehicle is dropping off, or picking up, passengers	Yes - if a motor vehicle is dropping off, or picking up, passengers	180
Work Zone	Yes - if the driver is driving a vehicle that is dropping off, or picking up, passengers	Yes - if the driver is driving a vehicle that is dropping off, or picking up, passengers	181

Table 5: Legislation provision for taxi/ride sourcing

As outlined above, there are a number of exemptions under the Road Rules that enable taxis and ride sourcing vehicles to drop off and pick-up passengers, however only taxis may drop off or pick-up passengers in a clearway or taxi zone.

6 Recommendations

Taxis

Analysing the current taxi ranks data, the following approach was applied to establish a strategy and action plan to improve the existing taxi rank and assess any future requests for new taxi ranks within the North Sydney LGA.

The average "Peak Turnover Rate per Hour per Bay" (PTRHB) of all the taxi ranks is 3 which is a reasonable turnover for a taxi rank in North Sydney LGA during peak hours. This value was used as a baseline target for each bay in each taxi rank.

- **High-Range Taxi Ranks:** Taxi ranks with more than 3 PTRHB (greater than 100% turnover) is recommended for additional bays.
- **Mid-Range Taxi Ranks:** Taxi ranks between 2 and 3 PTRHB (between 70% and 100% turnover) is recommended for the number of taxi bays to retain the same.
- **Low-Range Taxi Ranks:** Taxi ranks with less than 2 PTRHB (less than 70% turnover) is recommended for reduction in taxi bays.
- The total current available bays are multiplied by this value to determine the final changes in the number of bays, rounded up/down to the nearest whole number.
- Adjustment to some taxi ranks were made due to their unique situations.

Cremorne

- The PTRHB at **Cabramatta Road**'s Taxi rank is 53% which falls into the Low-range taxi ranks. It is recommended that the taxi rank be reduced by 2 bays and leaving a total number of 3 bays.

Crow's Nest

- The PTRHB at **Alexander Street** Taxi rank is 89% which falls into the Mid-Range taxi ranks, therefore no changes to the number of bays at this rank.
- The PTRHB at **Burlington Street** is 67% which falls into the Low-Range taxi ranks. It is recommended that the taxi rank be reduced by 1 bay and leaving a total number of 1 bay.

The combined PTRHB at **Willoughby Road** and **Angle parking spaces** is 119% which falls into the High-Range taxi ranks. Due to the use of unrestricted angle parking spaces on the eastern side of Willoughby Road by taxis, it is recommended that the taxi rank be retained, and 4 additional taxi spaces be provided on the eastern side of Willoughby Road (angle parking spaces) between 10pm-7am Mon-Fri. It is recommended that the taxi rank be increased by 4 bays, leaving a total number of 6 bays.

Milsons Point Train Station

- The PTRHB at **Ennis Road** is 100% which falls into the Mid-Range taxi ranks with no changes.

Neutral Bay

- The PTRHB at **Ben Boyd Road** (including the 2 Loading Zone spaces closer to Military Rd intersection) is 213% which falls into the High-Range taxi ranks. It is recommended that the taxi rank be increased by 3 bays and leaving a total number of 6 bays including Loading zones either sides of Taxi Rank.
- The PTRHB at **Rangers Road (Location 1, part time taxi zone)** is 47% which falls into the Low-Range taxi ranks. This will result in loss of 3 bays and leaving a total number of bays to 2.
- The PTRHB at **Rangers Road (Location 2, full time taxi zone)** is 50% which falls into the Low-Range taxi ranks. It is recommended that the taxi rank be reduced by 1 bay and leaving a total number of 1 bay.

North Sydney CBD

- The PTRHB at **Berry Street** is 100% which falls into the Mid-Range taxi ranks with no changes.
- The PTRHB at **McLaren Street** is 200% which falls into the High-Range taxi ranks. It is recommended that the taxi rank be increased by 2 bays and leaving a total number of 4 bays.
- The PTRHB at **Miller Street** is 133% which falls into the High-Range taxi ranks. It is recommended that the taxi rank be increased by 1 bay and leaving a total number of 2 bays. This can be reviewed/implemented once the Sydney Metro development is complete.

North Sydney Train Station

The combined PTRHB at **Blue Street fronting Harbourview Hotel (North side), (South side) and Blue Street and fronting Harbourview** is 98% which falls into the Mid-Range taxi ranks.

These taxi ranks operate in loop; hence their combined turnover was used for the purpose of this strategy. It is recommended that the taxi rank be retained therefore no changes to the number of taxi rank bays

The recommendation will result in the overall nett increase in taxi spaces by 2.

It is recommended that the taxi bays removed at the existing taxi ranks be relocated to higher demand location elsewhere in the North Sydney LGA subject to future requests from NSW Taxi Council and consultation with all stakeholders.

Any future requests for additional taxi spaces in North Sydney LGA, to be accommodated in the new "No Parking" and outside the "Loading Zones" operational times if the statistics show that at least 75% of drop off/pickups are being serviced by taxis in the requested zones/areas.

No.	Locality	Address	Existing Restriction	Peak Time	Total Bays	Peak Priority	(Peak time Avg Turnover Rate / hr / Bay) / (reasonable turnover) %	Impact on Taxi Spaces	Nett Gain / Loss	Proposed total Bays	Recommendations	Impact on Adjacent parking

Table 7: Existing Taxi Zones Recommendations – Priority 2

Ride Sourcing

The legislation does not make any provision for Ride Sourcing vehicles, however under the Road Rules 2014, Ride Sourcing vehicles may stop/park at certain locations as identified on table 5.

Ride Sourcing vehicles may drop off or pick up passengers using No Parking zones, Loading Zones, Metered parking spaces, Timed Parking Bays, Truck Zones and Work Zones. They are also permitted to drop off and pick up passengers on or across driveways.

Work zones are temporary measures during development of approved DA sites. There is high demand for Metered parking spaces and Timed Parking Bays, therefore it is not recommended to use these spaces for the purpose of Ride Sourcing vehicles.

There are two Truck Zones in the entire LGA, one with part time short term parking outside the Truck Zone hours, hence it is not recommended to be utilised for Ride Sourcing vehicles.

For the purpose of this strategy, Loading Zones and No Parking zones are considered suitable drop off and pick up zones for Ride Sourcing vehicles.

To make a provision for the Ride Sourcing vehicles using the available parking spaces in the North Sydney LGA with minimal impact on the existing on-street parking spaces, the "Loading Zones" and "No Parking" zones within the North Sydney LGA were identified and plotted on the map in Figure 17.

The current Loading zones and No Parking zones are sign posted differently with different time restriction. Therefore, every site needs to be investigated and re-signposted by Council if necessary.

This will be implemented by introducing a new "No Parking" restriction outside the "Loading zones" hours, where the extension complies with the road conditions, to allow for a 2 minute drop off/pick up.

The Full time "Loading zones" to be converted to timed loading zones, i.e 7am to 5pm Mon-Fri and 8am to 1pm Sat and introducing a new "No Parking" restriction outside the "Loading zones" hours, where the extension complies with the road conditions, to allow for a 2 minute drop off/pick up.

Similarly, the existing part time "No Parking" zones will be extended, where the extension complies with the road conditions to allow for a 2 minute drop off/pick up.

It is therefore recommended that the final locations of these zones be provided to the Ride Sourcing companies to be utilised by their Ride Sourcing partners for drop off and pick up purposes.

It is also recommended that any future requests for Ride Sourcing drop off/pick up locations to Council to be accommodated in new No Parking and Loading Zones subject to statistical evidence of increase in the number of drop off/pick ups in the requested areas/zones.

Existing Full time Loading Zones	
Existing Part time Loading Zones	
Existing No Parking Restrictions	

These zones are proposed to be changed to “No Parking” restrictions outside the existing “Part time Loading Zone” operating hours and changing the “Full time Loading Zones” to “Part time Loading Zones” and introduce “No Parking” restriction outside the Loading zone operating hours, allowing pick up and drop off passengers for taxis, ride sourcing and all road users.

Recommendations as a result of the Public Exhibition:

The draft Taxi and Ride sourcing Strategy and Action Plan was placed on public exhibition from 5 December 2019 to 17 February 2020. Advertisements were placed in local newspapers, on Council's website, Social media and direct letter to corporations to advise of the public exhibition of the policy. The recommendations of the Taxi and Ride Sourcing Strategy and Action Plan are as follows:

Taxis: Site Specific:

1. Convert the existing Bus Zone in **Pacific Highway**, south of Berry street, in front of Vodafone building to Taxi Zone (3 spaces) subject to consultation with the STA and TfNSW as priority 1 due to the high use of this zone by Taxis.
2. Consider using 'No Parking' signs to allow everybody to stop and set down or pick up people and at specific locations.
3. Installation of signs to show people on the footpath that taxis/rideshare can stop
4. convert no stopping zone to one space of "**No Parking Taxis Excepted**" in Alexander St north of Ernest Street.
5. convert no stopping zone to one space of "**No Parking Taxis Excepted**" in Alexander St south of Holtermann Street.
6. Convert the existing Bus Zone to one space of "**No Parking Taxis Excepted**" in Pacific Highway, north of Miller street
7. Convert no stopping zone to one (or more) space/s of "**No Parking Taxis Excepted**" in Pacific Highway south of Miller Street outside HSBC
8. Convert no stopping zone to 3 spaces of "**No Parking Taxis Excepted**" in Walker St outside Coles south of Mount St.
9. Convert no stopping zone to 3 spaces of "**No Parking Taxis Excepted**" in Miller St south of Blue Street.
10. Convert no stopping zone to 2 spaces of "**No Parking Taxis Excepted**" on the north side of Amherst St between Miller St and Miller Lane.
11. Below ranks to be called pop-up ranks:
 - a. Berry Street is used by taxi's 24hr and very busy during office hours. Your Survey only took in the operational rank hours not the actual hours Taxi's rank there be it illegal
 - b. Miller Street rank between Berry & Highway is not frequent used by passengers. It is a feeder for taxis to move down 50m to where they rank illegally because that's where the customers are.
 - c. There are several other illegal hoarding taxi areas which are high frequency pick up areas e.g. outside Coca-Cola.

12. Arthur Street, North Sydney (100 Arthur St) is a high volume demand location for Taxis. It is, however, a clearway. Whilst the NSW Taxi Council promotes the safe and legal pick up and drop off provisions for anyone wishing to provide Passenger Services, it must be noted that a high volume of patrons, still use this location to hail a Taxi.

Taxis: General recommendations:

13. Installation of “No Stopping, Taxis Excepted, 1 minute limit” signage, rather than “No Parking” be considered where practicable and subject to consultation with TfNSW.
14. Council should also consider the demand for these modes of transport at popular visitor attractions, such as the Coal Loader, the Ensemble Theatre, Hayden Orpheum Picture Palace, Luna Park and the North Sydney Olympic Pool.
15. Whilst point number one, “Monitor number of infringements issued to taxis over the next 2 years” is supported, we believe that the same would need to be applied to Rideshare (Ride Sourcing) vehicles.

Ride sourcing: General recommendations:

16. Include an action in the Draft Strategy and Action Plan to make it easier for ride sharing to take place at events.
17. Council should consider broadening action 3, which relates to providing an online map for Ride Share operators of existing loading zones and no parking zones in high demand areas, to include details of taxi zones and venues in the LGA. This would allow both taxi drivers and ride sourcing drivers to see where stopping or parking is permitted
18. As identified in Council's Smart City Strategy, Council is currently developing a Data Sharing Policy. The above information could also be provided as open data on either the Australian Government or NSW Government's data sharing portals: data.gov.au and data.nsw.gov.au (respectively) to encourage the development of online tools or apps.
19. With regard to ongoing monitoring and reporting, there are a range of smart city solutions to gauge the effectiveness of the implementation of the Strategy and Action Plan. Such solutions could potentially reduce officer time and provide more real-time information.
20. Uber appreciates that under the Road Rules these areas will need to officially remain 'No Parking' and 'Loading' zones, and that that signage will remain, however clear, customer friendly wayfinding and signage which describes its intended purposes would help promote use for rideshare pick up and drop off.

Action Plan

The following Action Plan has been developed with the objective of providing more opportunities for taxis to pick up and drop off and create new spaces for ride sourcing in North Sydney in the identified high demand areas to support the existing and growing number of these services. The Strategy and Action Plan also consolidates taxi zones in lower demand areas to make more efficient use of the finite parking resources in the North Sydney LGA. Figure 16 shows the target improvement area for the taxi network and the ride sourcing network to be achieved through implementation of this strategy and action plan by 2022.

As discussed previously, priority 1 is given to the sites with a turnover rate equal or above 5 or below 2.5. Any other sites between the turnover rate of 2.5 and 5 are given a priority 2. Expansion of No Parking zones and review of the outcome of the Strategy and Action Plan is given priority 3.

The new priority 4 is given to the new sites and subject to further detailed investigation by Council and consultation with all stakeholders.

The implementation of the action plan is subject to consultation with the affected community and all other stakeholders and approval by the North Sydney Traffic Committee.

Summary of Action Plans prior to the Public Exhibition

Action	Location(s)	Action Description	Priority	Timeframe
1	<ul style="list-style-type: none"> • Willoughby Road, Crows Nest • Ben Boyd Road, Neutral Bay • McLaren Street, North Sydney • Miller Street, North Sydney 	Increase Taxi zone spaces as per recommendations in Table 6 (Nett GAIN of 9 spaces)	1	2019/2020
2	<ul style="list-style-type: none"> • Cabramatta Road, Cremorne • Burlington Street, Crows Nest • Rangers Road, Neutral Bay 	Reduce Taxi zone spaces as per recommendations in Table 6 (Nett LOSS of 7 spaces)	1	2019/2020
3	Ride Sourcing High Demand Areas. (Taxis are already permitted to drop off/pick up passengers at these locations)	Provide online map for Ride Share operators of existing loading zones and No Parking zones in High Demand areas (as per Figure 16)	1	2019/2020
4	Ride Sourcing High Demand Areas. (Taxis are already permitted to drop off/pick up passengers at these locations)	Introduce "No Parking" restriction outside the existing part-time loading zone/times	2	2020/2021
5	Ride Sourcing High Demand Areas. (Taxis are already permitted to drop off/pick up passengers at these locations)	<ol style="list-style-type: none"> 1. Convert the existing full time "Loading Zone" to Part time "Loading Zone". 2. Introduce "No Parking" restriction outside the new part-time loading zone/times 	2	2020/2021
6	Ride Sourcing High Demand Areas. (Taxis are already permitted to drop off/pick up passengers at these locations)	Extend operating times of part-time "No Parking" zones to provide additional drop-off and pick-up zones outside the existing "No Parking" times in High Demand areas	3	2021/2022
7	Review outcomes of Taxi and Ride Sourcing Strategy and Action Plan	<ol style="list-style-type: none"> 1. Monitor number of infringements issued to taxis over the next 2 years. 2. Monitor number of taxi and ride sourcing trips to/from the North Sydney LGA over the next 2 years 	3	2021/2022

Table 8: taxi and Ride sourcing action plan (pre Public Exhibition)

Summary of Action Plans as a result of the Public Exhibition

Action	Location(s)	Action Description	Priority	Timeframe
1	Pacific Highway, south of Berry street, in front of Vodafone building.	Convert the existing Bus Zone to Taxi Zone (3 spaces) subject to consultation with the STA and TfNSW as priority 1 due to the high use of this zone by Taxis.	1	2019/2020
2	North Sydney LGA	Consider using 'No Parking' signs to allow everybody to stop and set down or pick up people and at specific locations.	3	2021/2022
3	North Sydney LGA	Installation of signs to show people on the footpath that taxis/rideshare can stop	3	2021/2022
4	Alexander St north of Ernest St	convert no stopping zone to one space of "No Parking Taxis Excepted"	2	2020/2021
5	Alexander St south of Holtermann St	convert no stopping zone to one space of "No Parking Taxis Excepted"	2	2020/2021
6	Pacific Highway, north of Miller St	Convert the existing Bus Zone to one space of "No Parking Taxis Excepted"	2	2020/2021
7	Pacific Highway south of Miller St outside HSBC	Convert no stopping zone to one (or more) space/s of "No Parking Taxis Excepted"	2	2020/2021
8	Walker St outside Coles south of Mount St	Convert no stopping zone to 3 spaces of "No Parking Taxis Excepted"	2	2020/2021
9	Miller St south of Blue St	Convert no stopping zone to 3 spaces of "No Parking Taxis Excepted"	2	2020/2021
10	North side of Amherst St between Miller St and Miller Lane	Convert no stopping zone to 2 spaces of "No Parking Taxis Excepted"	2	2020/2021
11	<ul style="list-style-type: none"> • Berry Street • Miller Street • There are several other illegal hoarding taxi areas which are high frequency pick up areas e.g. outside Coca-Cola. 	Investigate ranks to be converted to / called pop-up ranks	3	2021/2022
12	Arthur Street, North Sydney	Investigate suitable location/s for new Taxi Rank/s	2	2020/2021
13	North Sydney LGA	Installation of "No Stopping, Taxis Excepted, 1 minute limit" signage	3	2021/2022

14	Council should also consider the demand for these modes of transport at popular visitor attractions, such as the Coal Loader, the Ensemble Theatre, Hayden Orpheum Picture Palace, Luna Park and the North Sydney Olympic Pool.	Investigate suitable location/s for new Taxi Rank/s	2	2020/2021
15	North Sydney LGA	Whilst “Monitor number of infringements issued to taxis over the next 2 years” is supported, we believe that the same would need to be applied to Rideshare (Ride Sourcing) vehicles, (enforcement)	3	2021/2022
16	North Sydney LGA	Include an action in the Draft Strategy and Action Plan to make it easier for ride sharing to take place at events.	3	2021/2022
17	Ride Sourcing High Demand Areas. (Taxis are already permitted to drop off/pick up passengers at these locations)	Provide an online map for Ride Share operators of existing loading zones and no parking zones in high demand areas, to include details of taxi zones and venues in the LGA	1	2019/2020
18	North Sydney LGA	As identified in Council’s Smart City Strategy, Council is currently developing a Data Sharing Policy. The above information could also be provided as open data on either the Australian Government or NSW Government’s data sharing portals: data.gov.au and data.nsw.gov.au (respectively) to encourage the development of online tools or apps.	3	2021/2022
19	North Sydney LGA	With regard to ongoing monitoring and reporting, there are a range of smart city solutions to gauge the effectiveness of the implementation of the Strategy and Action Plan. Such solutions could potentially reduce officer time and provide more real-time information.	3	2021/2022
20	North Sydney LGA	Clear, customer friendly wayfinding and signage which describes its intended purposes would help promote use for rideshare pick up and drop off.	3	2021/2022
