# **PURPOSE:**

The purpose of this report is to provide details of the performance of Council's investments and loans for the month ending 31 July 2024.

# **EXECUTIVE SUMMARY:**

- All investments have been made in accordance with the Local Government Act and Regulations and Council's Financial Investments Policy.
- For the month of July, the total investment portfolio (Term Deposits, Floating Rate Notes and Bonds) provided a return of +0.28% (actual), or +3.32% p.a. (annualised), underperforming the benchmark AusBond Bank Bill Index return of +0.37% (actual), or +4.49% p.a. (annualised). This is due to Council holding term deposits made in a low inflation environment when interest rate rises were not expected, and a higher than usual percentage of investments held as cash to pay for expected project costs.
- Returns on investments exceed the YTD budget by \$209,000.

# **RECOMMENDATION:**

**1. THAT** the report on Investments held at 31 July 2024, prepared in accordance with clause 212 of the Local Government (General) Regulation 2021, and the information on Loan Borrowings be received.

# Background

Clause 212 of the Local Government (General) Regulation 2021, states that the Responsible Accounting Officer must provide Council with a monthly report detailing all funds invested under Section 625 of the Local Government Act 1993. This report must include certification that the investments have been made in accordance with the Act and the Regulations made thereunder, also the revised Investment Order issued by the Minister for Local Government and Council's Financial Investment Policy.

It is also prudent to report loan balances and compliance with borrowing orders issued by the Minister for Local Government and Council's Debt Management Policy.

# Total Cash and Investment Balance and Reserves

The total cash and investment balance is \$140,810,578. Most of this balance is held in reserves to be spent on certain activities and projects. Reserves fall into one of two categories:

- external restrictions (Council is obliged by legislation, or contract, to spend the funds on certain projects and activities); and
- internal allocations (Council has resolved to spend the funds on certain projects and activities).

The following table details the reserves, held as at 31 July 2024. Council holds an unrestricted cash balance of \$2.0 million, indicating it has funded all its reserves.

| External Restrictions and Internal Allocations               |              |
|--|--------------|
| External restrictions  |              |
| Developer contributions – general                            | \$48,935,634 |
| Domestic waste management                                    | \$14,946,485 |
| Unexpended Special Rates                                     | \$64,438     |
| Unspent borrowings - North Sydney Olympic Pool redevelopment | \$20,000,000 |
| Waste and sustainability improvement funds                   | \$37,646     |
| Specific purpose grants                                      | \$6,059,069  |
| Other specific purpose contributions                         | \$2,081,088  |
| Total external restrictions                                  | \$92,124,360 |
|  |              |
| Internal allocations   |              |
| Capital works  | \$11,602,014 |
| Community housing - capital purchases                        | \$962,601    |
| Community housing - major maintenance                        | \$490,657    |
| Deposits, retentions, and bonds                              | \$14,947,287 |
| Employees leave entitlement                                  | \$7,092,831  |
| I.T. hardware and software                                   | \$1,277,121  |
| Income producing projects                                    | \$782,006    |
| Olympic Pool Redevelopment                                   | \$6,750,748  |
| Plant and vehicle replacement                                | \$2,767,335  |
| Total internal allocations                                   | \$46,672,600 |

| External Restrictions and Internal Allocations |               |  |  |
|--|---------------|--|--|
| Total Restrictions and Allocations             | \$138,796,960 |  |  |
| Unrestricted Cash and Investments              | \$2,013,618   |  |  |
| Total Cash and Investments                     | \$140,810,578 |  |  |

Work on the Financial Statements for the Year Ended 30 June 2024 is underway. As the accounts for that year are not finalised these reserve balances are subject to further revision.

# Investment Portfolio

The following table details the performance of Council's investment portfolio (excluding cash deposits) to the benchmark for the month of July 2024 - and annualised for the year-to-date (including investments that have matured prior to that date).

|                     | July 2024 | Annualised YTD |  |
|---------------------|-----------|----------------|--|
| Actual Return 0.28% |           | 3.32%          |  |
| Benchmark           | 0.37%     | 4.49%          |  |
| Variance            | -0.09%    | -1.17%         |  |

The portfolio underperformance, as compared to the benchmark, is due to rises in the RBA official cash rate and long-term investments that were placed when inflation expectations were low and before those increases were made and a higher than usual percentage of investments held as cash to pay for expected project costs.

| Asset Type                 | Market Value  | Portfolio Breakdown |
|----------------------------|---------------|---------------------|
| Term Deposits              | \$103,500,000 | 73.50%              |
| Cash                       | \$26,909,514  | 19.11%              |
| Fixed Bonds                | \$9,000,000   | 6.39%               |
| Floating Rate Notes (FRNs) | \$1,401,604   | 0.99%               |
|                            | \$140,810,578 | 100.00%             |

Council's average duration of term deposits, which comprise 73.50% of the investment portfolio, is approximately 236 days. The average duration continues to fall to align maturities with expected outflows on the capital works program.

All funds have been invested in accordance with the Act and the Regulations made thereunder. Council's investment portfolio complies with the revised Investment Order issued by the Minister for Local Government, which places restrictions on the type of investments permitted. All investments accord with Council's Financial Investments Policy.

Council continues to seek independent advice for investments and are actively managing the portfolio to ensure that returns are maximised, considering diversification and risk. A complete analysis of the performance is covered in the Monthly Investment Report (Attachment 1) prepared by Council's investment advisor, Arlo Advisory. The report contains advice about optimal investment options, but also notes that Council's scope to act on that advice is limited by its cash flow requirements. Council has considerable requirements for

short term investments and deposits at call to fund its Capital Works budget including the North Sydney Olympic Pool project.

# Summary of Returns from Investments (includes Fair Value adjustments)

The actual investment returns for the year-to-date 31 July 2024 are \$208,881 more than the revised year-to-date budget.

| Year       | Original<br>Annual<br>Budget | Revised<br>Annual<br>Budget | YTD<br>Budget<br>(July) | YTD (July)          | YTD Actual<br>FV<br>adjustments<br>(July) | YTD Budget<br>to Actual<br>Variance<br>(July) |
|------------|------------------------------|-----------------------------|-------------------------|---------------------|---|---|
| 2024/25    | \$2,534,059                  | \$2,534,059                 | \$211,088               | \$420,670           | -\$701                                    | \$208,881                                     |
|            | _                            |                             |                         |                     |   |   |

|            | Budget                       | Budget                      |                         |                     | adjustments                               | Actual  |
|            |                              |                             |                         |                     |   | Variance                                      |
| 2023/24    | \$2,500,000                  | \$5,490,000                 |                         | \$5,413,310         | \$5 <i>,</i> 334                          | -\$71,356                                     |
| 2022/23    | \$1,384,350                  | \$3,340,000                 |                         | \$3,685,634         | \$4,647                                   | \$350,281                                     |
| 2021/22    | \$1,182,500                  | \$1,362,500                 |                         | \$1,302,826         | \$64,865                                  | \$5,191                                       |

Floating Rate Notes (FRNs) are required to be revalued each month using the Fair Value (FV) method, an estimate of the market value of the investment. The YTD movement of FRN's has seen a decrease of \$701.

# Financial Investment Policy

All categories are within the Policy limits for credit ratings. The portfolio remains well diversified, with credit quality rated as BBB, or higher. The maximum holding limit in each rating category and the target credit quality weighting for Council's portfolio are:

| Long Term Rating Range<br>(Standard & Poors) | Invested      | Maximum Policy<br>Holding | Distribution |
|--|---------------|---------------------------|--------------|
| AA Category                                  | \$113,409,514 | 100.00%                   | 80.55%       |
| A Category                                   | \$26,000,000  | 60.00%                    | 18.46%       |
| BBB Category                                 | \$1,401,064   | 35.00%                    | 0.99%        |
| Unrated ADIs (NR)                            | \$0           | 10.00%                    | 0.00%        |

# Loan Borrowings

Council's Loan Borrowing Policy is the framework for Council's borrowing activities. This defines responsibilities and parameters for borrowing and related risk management activities. The Policy's objective is to control Council's exposure to movements in interest rates through the application of fixed, floating, or a combination thereof, to maintain a risk averse strategy.

Loan borrowings are in line with the following principles:

- a) That the capital cost of infrastructure be recognised over the period during which the benefits will be enjoyed.
- b) That loan funds are a resource to fund the replacement and upgrading of existing infrastructure and fund the creation of new infrastructure.
- c) That loan funds will be limited to:
  - acquisition or enhancement of income producing assets;
  - construction and/or upgrading of buildings; and
  - infrastructure assets that have a life expectancy of greater than 10 years.

Council has three debt facilities:

# Alexander Street Carpark and On-Street Carparking Management System Loan

This is a fixed loan financing option, fully amortising the drawn down amount of \$9,500,000 over 10 years, fixed interest rate, with quarterly repayments of interest and principal. The loan details are:

| Loan amount:            | \$ 9,500,000.00                                 |                                |                           |                                 |
|-------------------------|---|--------------------------------|---------------------------|---------------------------------|
| Loan term:              | 10 years  |                                |                           |                                 |
| From:                   | 31/07/2018                                      |                                |                           |                                 |
| То:                     | 31/07/2028                                      |                                |                           |                                 |
| Interest rate:          | 4.02%p.a.(fixed)                                |                                |                           |                                 |
| Repayment:              | Quarterly                                       |                                |                           |                                 |
|                         |   |                                |                           |                                 |
|                         |   |                                |                           |                                 |

# Loan Funded Capital Projects:

Project 1: Upgrading the Car Park in Alexander Street, Crows Nest\$5 million loan was sourced to fund project.Current length of Loan as per the Long-Term Financial Plan (LTFP): 10 years to 2028

Project 2: Upgrading of On-Street Parking Management System\$4.5 million loan was sourced to fund project.Current length of Loan as per LTFP: 10 years to 2028

# Loans for North Sydney Olympic Pool Redevelopment

In February 2022, Council established a \$31 million TCorp loan facility to partially fund the redevelopment of North Sydney Olympic Pool. Drawdown on the facility was processed on 28 April 2022. The funds were restricted and released, as required, to fund project cash outflows. At 31 May 2024, these loan funds had been fully expended.

This loan is a fixed loan financing option, fully amortising the drawn down amount of \$31,000,000 over 20 years, fixed interest rate with semi-annual repayments of interest and principal. The loan details are:

| Loan amount:   | \$31,000,000.00  |              |              |                |
|----------------|------------------|--------------|--------------|----------------|
| Loan term:     | 20 years         |              |              |                |
| From:          | 28/04/2022       |              |              |                |
| То:            | 28/04/2042       |              |              |                |

In July 2024, Council established a \$20 million TCorp loan facility to fund further budget requirements of the redevelopment of North Sydney Olympic Pool. Drawdown on the facility was processed on 27 July 2024. The funds have been invested with a maturity profile to match cash flow requirements of the project. The funds have been restricted and will be released, as required, to fund project cash outflows. As of 31 July 2024, all \$20 million is restricted.

This loan is a fixed loan financing option, fully amortising the drawn down amount of \$20,000,000 over 10 years, fixed interest rate with semi-annual repayments of interest and principal. The loan details are:

| Loan amount:   | \$20,000,000.00  |                       |                       |                |

# **Consultation Requirements**

Community engagement is not required.

# **Financial/Resource Implications**

Returns are higher than budgeted in the month of July due to phasing of the Capital Works program. At this stage it is expected the annual returns will be in line with the budget.

# Legislation

Section 625 of the Local Government Act (NSW) allows councils to invest money that is not currently required for any other purpose. It further specifies how councils may invest. It specifies investments must be in accordance with the local government minister's orders. Clause 212 of the Local Government Regulation (NSW) 2021 requires that the Responsible Accounting Officer must make a monthly report to Council, setting out all details of money invested under Section 625 of the Local Government Act.

Sections 621 to 624 of the Local Government Act give councils the ability to borrow money and specify some further regulations on that borrowing. Council's staff consider it prudent to provide monthly reporting of loans.

# Market Update Summary

In July, risk markets provided modest returns again, boosted by softening inflation and expectations of interest rate cuts in the short to medium term.

In the deposit market, over July, the average deposit rates offered by the major banks increased across most tenors as the market priced the potential of another rate hike prior to the lower than expected inflation print on the last day of July. Notably, the average deposit rates offered by the major banks rose in the 6–12 months tenors by around 5bp, compared to where they were in June. The deposit curve remains inverse with rates peaking at the 12 month tenor and then dipping/flattening across the 2–5 year terms (with the lowest rates offered in the 4 year tenor), with the market still factoring in multiple rate cuts starting next year.

Source: Imperium Markets

With a global economic downturn and interest rate cuts still being priced over the next 18–24 months, investors should consider diversifying and taking an 'insurance policy' against a potentially lower rate environment by investing across 2–5 year fixed deposits, targeting rates above 5% p.a. (small allocation only).

Arlo Advisory - Monthly Investment Review

# North Sydney Council' Portfolio & Compliance

#### **Asset Allocation**

As at the end of July 2024, the portfolio was mainly directed to fixed term deposits (74%). The remaining portfolio is directed to FRNs (1%), fixed bonds (6%) and overnight cash accounts (19%).

Senior FRNs remain relatively attractive as spreads have generally widened over the past 2–3 years. New issuances may be considered again on a case by case scenario. In the interim, staggering a mix of fixed deposits between 9–12 months to 2 years remains a more optimal strategy to maximise returns over a longer-term cycle.

With interest rate cuts and a global economic downturn being priced in coming years, investors can choose to allocate a small proportion of longer-term funds and undertake an insurance policy against any potential future rate cuts by investing across 2–5 year fixed deposits, locking in and targeting yields close to or above 5% p.a.

However, noting the significant capital outflows expected in the near term, Council is currently largely restricted to investing into very short-term investments (under 12 months). This is suitable to invest in short-dated fixed term deposits or high yielding cash accounts.

|              |               | TD - 73.50% |
|--------------|---------------|-------------|
|              | CASH - 19.11% |             |
| BOND - 6.39% |               |             |
| FRN - 0.99%  |               |             |

### Term to Maturity

Overall, the portfolio remains lightly diversified from a maturity perspective. Around 15% of assets is directed to medium-term assets (1-2 years), which has resulted in strong outperformance during the challenging economic environment over longer-term time periods. There is still high capacity to invest in the short-medium term horizon (1-2 years), with approximately \$78m at month-end.

Where liquidity permits (once immediate capital projects are finalised), we recommend new surplus funds be directed to 1-3 year horizon given this will help optimise returns over the long-run. We suggest this be allocated to any remaining attractive fixed term deposits.

In the interim, given the large upcoming capital expenditure of \$94.1 (as per the September 2023 Quarter Budget Review) flagged in the short-term, Council is likely to invest across shorter-tenors to match the capital program's cash flow requirements.

| Compliant | Horizon       | Invested (\$) | Invested (%) | Min. Limit (%) | Max. Limit (%) | Available (\$) |

# **Counterparty**

As at the end of July, all individual limits comply with the Policy. We remind Council exposures to individual ADIs are driven by the portfolio's movements throughout any month. Overall, the portfolio is lightly diversified across the investment grade spectrum, with no exposure to the unrated ADIs.

| Compliant | Issuer        | Rating | Invested (\$) | Invested (%) | Max. Limit (%) | Available (\$) |
|-----------|---------------|--------|---------------|--------------|----------------|----------------|
| ✓         | CBA           | AA-    | \$39,909,514  | 28.34%       | 30.00%         | \$2,333,659    |

|           |               |        | \$140,810,578 | 100.00%      |                |                |

On 31<sup>st</sup> July 2024, ANZ's takeover of Suncorp Bank was formalised, and ratings agency S&P upgraded Suncorp's long-term credit rating to that of its parent company immediately (now rated AA-). Any future investments with Suncorp will now be reflected under the parent company being ANZ.

# **Credit Quality**

The portfolio remains well diversified from a credit ratings perspective, with all assets classified as investment grade (rated BBB- or higher). As at the end of July 2024, all categories were within the Policy limits:

| Compliant | Credit Rating | Invested (\$) | Invested (%) | Max. Limit (%) | Available (\$) |
|-----------|---------------|---------------|--------------|----------------|----------------|
| ✓         | AA Category   | \$113,409,514 | 80.54%       | 100%           | \$27,401,064   |
| ✓         | A Category    | \$26,000,000  | 18.46%       | 60%            | \$58,486,347   |
| ✓         | BBB Category  | \$1,401,064   | 0.99%        | 35%            | \$47,882,638   |
| ✓         | Unrated ADIs  | \$0           | 0.00%        | 10%            | \$14,081,058   |
|           |               | \$140,810,578 | 100.00%      |                |                |

### Performance

Council's performance for the month ending July 2024 is summarised as follows:

| Performance (Actual)     | 1 month | 3 months | 6 months | FYTD   | 1 year | 2 years | 3 years |
|--------------------------|---------|----------|----------|--------|--------|---------|---------|
| Official Cash Rate       | 0.36%   | 1.08%    | 2.15%    | 0.36%  | 4.30%  | 3.75%   | 2.58%   |
| AusBond Bank Bill Index  | 0.37%   | 1.10%    | 2.18%    | 0.37%  | 4.37%  | 3.76%   | 2.56%   |
| Council's T/D Portfolio  | 0.29%   | 0.90%    | 1.85%    | 0.29%  | 3.77%  | 3.18%   | 2.54%   |
| Council's FRN Portfolio  | 0.47%   | 1.41%    | 2.83%    | 0.47%  | 5.61%  | 4.94%   | 3.80%   |
| Council's Bond Portfolio | 0.10%   | 0.29%    | 0.58%    | 0.10%  | 1.17%  | 1.17%   | 1.16%   |
| Council's Portfolio^     | 0.28%   | 0.86%    | 1.77%    | 0.28%  | 3.62%  | 3.07%   | 2.47%   |
| Rel. Performance         | -0.10%  | -0.25%   | -0.41%   | -0.10% | -0.76% | -0.69%  | -0.10%  |

^Total portfolio performance excludes Council's cash account holdings.

| Performance (% p.a.)     | 1 month | 3 months | 6 months | FYTD   | 1 year | 2 years | 3 years |

| Council's Portfolio^     | 3.32%   | 3.44%    | 3.58%    | 3.32%  | 3.62%  | 3.07%   | 2.47%   |
| Rel. Performance         | -1.17%  | -1.00%   | -0.84%   | -1.17% | -0.76% | -0.69%  | -0.10%  |

^Total portfolio performance excludes Council's cash account holdings.

For the month of July, the total investment portfolio (excluding cash) provided a solid return of +0.28% (actual) or +3.32% p.a. (annualised), underperforming the benchmark AusBond Bank Bill Index return of +0.37% (actual) or +4.49% p.a. (annualised). This relative 'underperformance' has been due to the unexpected aggressive rate hikes undertaken by the RBA over the past two years. Whilst this 'underperformance' may continue in the short-term, we do anticipate this to be fairly temporary, especially if the RBA is approaching the end of its rate hike cycle.

Note this ongoing period of underperformance is also highly dependent on reinvesting maturing funds at prevailing market rates beyond 6 month tenors. With large capital outflows, maturing funds are largely being spent or kept in low yielding short-dated assets. Council should also remind itself it has consistently 'outperformed' over longer-term time periods (last +10yrs).

We are pleased that North Sydney Council remains amongst the best performing Councils in the state of NSW where deposits are concerned. We have been pro-active in our advice about protecting interest income for many years and encouraged to maintain a slightly long duration position as this optimises the overall returns of the portfolio in the long-run.

Arlo Advisory - Monthly Investment Review

### **Recommendations for Council**

### **Term Deposits**

As at the end of July 2024, Council's deposit portfolio was yielding **3.61% p.a.** (up 6bp from the previous month), with a weighted average duration of around 236 days (~8 months). We recommend Council slightly increases this weighted average duration, should cash flows allow in future.

In the immediate future, given the significant outflows anticipated from capital projects, short-dated term deposits are suitable for North Sydney Council's purposes.

Please refer to the section below for further details on the Term Deposit market.

### Securities

Primary (new) **FRNs** (with maturities between 3–5 years) continue to be appealing (particularly for those investors with portfolios skewed towards fixed assets) and should be considered on a case by case scenario.

Please refer to the section below for further details on the FRN market.

#### Council's Senior FRNs Sale/Switch Recommendations

We recommend Council retains the Newcastle FRN at this stage (still yielding well above 5½% p.a.). We will inform Council when there is an opportunity to sell this FRN to boost the overall returns of the investment portfolio, most likely over the next 3 months.

### Council's Senior Bonds

During October 2020, Council placed two parcels of \$3m (totalling \$6m) with the Northern Territory Treasury Corporation (NTTC), locking in yields of 0.90% p.a. and 1.00% p.a. for a 4 and 5 year term respectively. In August 2021, it placed another \$3m parcel with NTTC (AA-), locking in a yield of 1.50% p.a. for a 5 year term.

Council received the full rebated commission of 0.25% on the total face value of investments (i.e. \$9m x 0.25% = \$22,500) as it was introduced by Imperium Markets (sister company of Arlo Advisory). We believe these investments were prudent at the time of investment especially after the rate cut delivered in early November 2020 to 0.10% and the RBA's forward guidance on official interest rates (no rate rises "until at least 2024"). The NTTC bonds are a 'retail' offering and not 'wholesale' issuances. Given the lack of liquidity and high penalty costs if they were to be sold/redeemed prior to the maturity date, they are considered to be a hold-to-maturity investment and will be marked at par value (\$100.00) throughout the term of investment.

# Term Deposit Market Review

# **Current Term Deposits Rates**

As at the end of July, we see value in the following:

| ADI        | LT Credit Rating | Term    | Rate % p.a. |
|------------|------------------|---------|-------------|
| ING        | А                | 5 years | 5.15%       |
| BoQ        | A-               | 5 years | 5.00%       |
| ING        | A                | 4 years | 5.07%       |
| BoQ        | A-               | 4 years | 5.00%       |
| ING        | A                | 3 years | 5.03%       |
| BoQ        | A-               | 3 years | 4.90%       |
| ING        | А                | 2 years | 5.11%       |
| Bank of Us | BBB+             | 2 years | 5.10%       |
| NAB        | AA-              | 2 years | 4.95%       |
| Westpac    | AA-              | 2 years | 4.90%       |
| BoQ        | A-               | 2 years | 4.90%       |

The above deposits are suitable for investors looking to maintain diversification and lock-in a slight premium compared to purely investing short-term.

For terms under 12 months, we believe the strongest value is currently being offered by the following ADIs (we stress that rates are indicative, dependent on daily funding requirements and different for industry segments):

| ADI              | LT Credit Rating | Term      | Rate % p.a. |
|------------------|------------------|-----------|-------------|
| NAB              | AA-              | 12 months | 5.30%       |
| ING              | А                | 12 months | 5.29%       |
| BankVIC          | BBB+             | 12 months | 5.25%       |
| ICBC             | А                | 12 months | 5.21%       |
| Bank of Us       | BBB+             | 12 months | 5.13%       |
| NAB              | AA-              | 9 months  | 5.30%       |
| Bendigo-Adelaide | A-               | 9 months  | 5.17%       |
| Bank of Sydney   | Unrated          | 9 months  | 5.15%       |
| ING              | А                | 9 months  | 5.12%       |

If Council does not require high levels of liquidity and can stagger a proportion of its investments across the longer term horizons (1–5 years), it will be rewarded over a longer-term cycle. Investing a spread of 12 months to 3 year horizons is likely to yield, on average, up to  $\frac{1}{2}$ % p.a. higher compared to those investors that entirely invest in short-dated deposits (under 6–9 months).

With a global economic slowdown and interest rate cuts being priced over the next few years, investors should strongly consider diversifying by allocating some longer term surplus funds and undertake an insurance policy by investing across 2–5 year fixed deposits and locking in rates above 5% p.a. This will provide some income protection with central banks now potentially looking to cut rates in 2025.

### **Term Deposits Analysis**

Pre-pandemic (March 2020), a 'normal' marketplace meant the lower rated ADIs (i.e. BBB category) were offering higher rates on term deposits compared to the higher rated ADIs (i.e. A or AA rated). But due to the cheap funding available provided by the RBA via their Term Funding Facility (TFF) during mid-2020, allowing the ADIs to borrow as low as 0.10% p.a. fixed for 3 years, those lower rated ADIs (BBB rated) did not require deposit funding from the wholesale deposit. Given the higher rated banks had more capacity to lend (as they have a greater pool of mortgage borrowers), they subsequently were offering higher deposit rates. In fact, some of the lower rated banks were not even offering deposit rates at all. As a result, most investors placed a higher proportion of their deposit investments with the higher rated (A or AA) ADIs over the past three years.

#### Term Deposit Rates – 12 months after pandemic (March 2021)

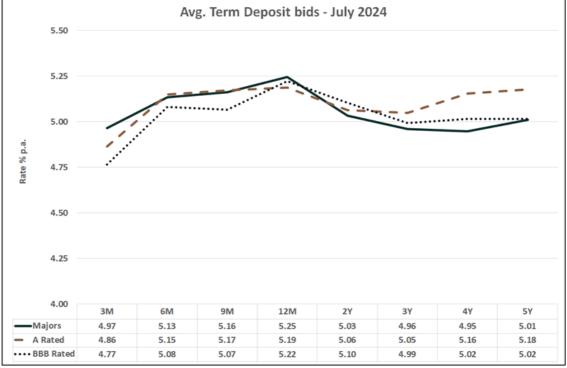

Source: Imperium Markets

The abnormal marketplace experienced during the pandemic is starting to reverse as the competition for deposits slowly increases, partially driven by the RBA's term funding facility coming to an end. In recent months, we have started to periodically see some of the lower rated ADIs ("A" and "BBB" rated) offering slightly higher rates compared to the domestic major banks ("AA" rated) on different parts of the curve (i.e. pre-pandemic environment). Some of this has been attributed to lags in adjusting their deposit rates as some banks (mainly the lower rated ADIs) simply set their rates for the week.

Arlo Advisory – Monthly Investment Review

Going forward, Council should have a larger opportunity to invest a higher proportion of its funds with the lower rated institutions (up to Policy limits), from which the majority are not lending to the Fossil Fuel industry or considered 'ethical'. We are slowly seeing this trend emerge (as was the case this month at the longer-end of the curve), although the major banks always seem to react more quickly than the rest of the market during periods of volatility:

#### Term Deposit Rates – Currently (July 2024)

# Regional & Unrated ADI Sector

Ratings agency S&P has commented that "*mergers remain compelling for mutuals lenders*" in providing smaller lenders greater economies of scale and assisting them in being able to price competitively and will see "*the banking landscape will settle with a small number of larger mutual players*". S&P expects that consolidation to continue over the next two years.

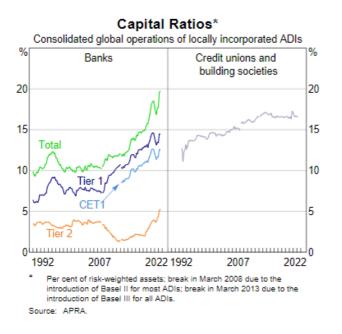

We remain supportive of the regional and unrated ADI sector (and have been even throughout the post-GFC period). They continue to remain solid, incorporate strong balance sheets, while exhibiting high levels of capital – typically, much higher compared to the higher rated ADIs. Some unrated ADIs have up to 25-40% more capital than the domestic major banks, and well above the Basel III requirements.

Overall, the lower rated ADIs (BBB and unrated) are generally now in a better financial position then they have been historically (see the Capital Ratio figure below). The financial regulator, APRA has noted that the Common Equity Tier 1 capital of Australian banks now exceeds a quarter of a trillion dollars. It has increased by \$110 billion, or more than 70%, over the past decade. Over the same time, banks' assets have grown by 44%. Some of the extra capital is supporting growth in the banking system itself but clearly, there has been a strengthening in overall resilience and leverage in the system is lower.

We believe that deposit investments with the lower rated ADIs should be considered going forward, particularly when they offer 'above market' specials. Not only would it diversify the investment portfolio and reduce credit risk, it would also improve the portfolio's overall returns. The lower rated entities are generally deemed to be the more 'ethical' ADIs compared to the higher rated ADIs.

In the current environment of high regulation and scrutiny, all domestic (and international) ADIs continue to carry high levels of capital. There is minimal (if any) probability of any ADI defaulting on their deposits going forward – this was stress tested during the GFC and the pandemic period. APRA's mandate is to *"protect depositors"* and provide *"financial stability"*.

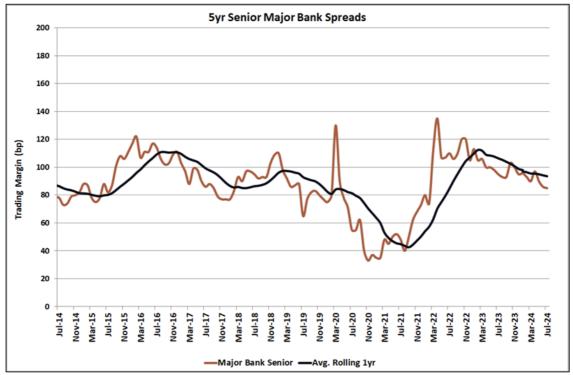

#### Arlo Advisory - Monthly Investment Review

# Senior FRNs Market Review

Over July, amongst the senior major bank FRNs, physical credit securities remained flat at the 5 year part of the curve but tightened around 6bp in the 3 year part of the curve. During the month, ANZ (AA-) issued a dual 3 & 5 year senior deal at +70bp and +86bp respectively. Major bank senior securities remain at fair value on a historical basis although looking fairly expensive if the 5yr margin tightens to +80bp in the near future.

Source: IBS Capital

There was minimal issuance again during the month apart from:

- Rabobank (A+) 5 year senior FRN at +91bp
- Agricultural Bank of China (A) 3 year senior FRN at +80bp

Amongst the "A" and "BBB" rated sector, the securities remained flat at the longer-end of the curve. Overall, credit securities are looking more attractive given the widening of spreads over the past 2-3 years. FRNs will continue to play a role in investors' portfolios mainly on the basis of their liquidity and the ability to roll down the curve and gross up returns over ensuing years (in a relatively stable credit environment), whilst also providing some diversification to those investors skewed towards fixed assets.

Arlo Advisory - Monthly Investment Review

| Senior FRNs (ADIs) | 31/07/2024 | 28/06/2024 |
|--------------------|------------|------------|
| "AA" rated – 5yrs  | +85bp      | +86bp      |
| "AA" rated – 3yrs  | +65bp      | +71bp      |
| "A" rated – 5yrs   | +100bp     | +105bp     |
| "A" rated – 3yrs   | +80bp      | +82bp      |
| "BBB" rated – 3yrs | +130bp     | +130bp     |

Source: IBS Capital

We now generally recommend switches ('benchmark' issues only) into new primary issues, out of the following senior FRNs that are maturing:

- On or before mid-2026 for the "AA" rated ADIs (domestic major banks);
- On or before mid-2025 for the "A" rated ADIs; and
- Within 6-9 months for the "BBB" rated ADIs (consider case by case).

Investors holding onto the above senior FRNs ('benchmark' issues only) in their last few years are now generally holding sub optimal investments and are not maximising returns by foregoing realised capital gains. In the current challenging economic environment, any boost in overall returns should be locked in when it is advantageous to do so, particularly as switch opportunities become available.

# Senior Fixed Bonds – ADIs (Secondary Market)

With global inflation still high by historical standards, this has seen a significant lift in longer-term bond yields over the past 2-3 years (valuations have fallen) as markets have reacted sharply.

This has resulted in some opportunities in the secondary market. We currently see value in the following fixed bond lines, with the majority now being marked at a significant discount to par (please note supply in the secondary market may be limited on any day):

| ISIN         | lssuer  | Rating | Capital<br>Structure | Maturity<br>Date | ~Remain.<br>Term<br>(yrs) | Fixed<br>Coupon | Indicative<br>Yield |
|--------------|---------|--------|----------------------|------------------|---------------------------|-----------------|---------------------|
| AU3CB0278174 | UBS     | A+     | Senior               | 26/02/2026       | 1.58                      | 1.1000%         | 4.98%               |
| AU3CB0280030 | BoQ     | A-     | Senior               | 06/05/2026       | 1.77                      | 1.4000%         | 5.20%               |
| AU3CB0299337 | Bendigo | A-     | Senior               | 15/05/2026       | 1.79                      | 4.7000%         | 5.08%               |

| AU3CB0308955 | BoQ     | A-     | Senior               | 30/04/2029       | 4.76                      | 5.3580%         | 5.19%               |

# **Economic Commentary**

# International Market

In July, risk markets provided modest returns again, boosted by softening inflation and expectations of interest rate cuts in the short to medium term.

Across equity markets, the S&P 500 Index rose +1.13% over the month, whilst the NASDAQ lost -0.75% as tech companies were sold off. Europe's main indices rose across the board, led by UK's FTSE (+2.50%), Germany's DAX (+.150%) and France's CAC (+0.70%).

The US Fed's preferred PCE measure of inflation was benign. Headline PPI was +0.2% m/m vs. +0.1% expected and core PPI was +0.4% m/m and +0.2% expected. The rise in the core measure was the lowest increase since Jan 2021.

The US unemployment rate rose by 0.1% to 4.1% versus 4.0% expected. Unemployment at 4.1% is a touch above the end 2024 FOMC dot of 4.0%, but broadly near where the FOMC's long-run natural rate of unemployment is which is pegged at 4.2%.

The average of the two core (mean and median) measures of Canada's CPI fell by -0.1% to +2.75%, as expected. The headline rate fell to +2.7% from +2.9%, 0.1% more than expected. The Bank of Canada delivered a widely expected 25bp cut and signalled more, noting that "downside risks are taking on increased weight".

UK CPI was 0.1% higher than expectations. Headline inflation held steady at a +2.0% annual rate compared with expectations of a dip to +1.9%, whilst core inflation was also 0.1% above consensus at +3.5%.

Eurozone inflation was as expected in June, rising +0.2% m/m and +2.5% y/y. Eurozone unemployment rate was unchanged over the month at 6.4% in May, and was slightly down from 6.5% recorded previously.

China's CPI came in at +0.2% y/y, a little below the +0.4% expected, doing nothing to suggest any sign of domestic inflation pressures.

The RBNZ kept the Official Cash Rate steady at 5.50%, with the accompanying statement suggesting a moderation in the Bank's hawkish stance. New Zealand's Q2 headline annual CPI declined to +3.3% from +4.0% in Q1, 0.1% below consensus and better than the RBNZ's May forecast of +3.6%.

The MSCI World ex-Aus Index rose +1.70% for the month of July:

| Index                    | 1m     | 3m     | 1yr     | 3yr    | 5yr     | 10yr    |
|--------------------------|--------|--------|---------|--------|---------|---------|
| S&P 500 Index            | +1.13% | +9.66% | +20.34% | +7.91% | +13.13% | +11.08% |
| MSCI World ex-AUS        | +1.70% | +8.08% | +16.75% | +5.29% | +10.48% | +7.82%  |
| S&P ASX 200 Accum. Index | +4.19% | +6.21% | +13.53% | +7.44% | +7.52%  | +8.03%  |

Arlo Advisory – Monthly Investment Review

# **Domestic Market**

The minutes from the RBA's June meeting provided no surprises, but highlighted the central bank's hawkish stance with the implication that it may increase the cash rate if it believes inflation would not return to the mid-point of its target band by mid-2026.

The consumer price index (CPI) rose +1.0% in the June quarter, in line with expectations, and +3.8% annually (up from +3.6% in the March quarter). The trimmed mean rose +0.8% for the quarter, taking the annual rate to +3.9% (from +4.0% the previous quarter).

The seasonally adjusted unemployment rate rose by 0.1% to 4.1% in June, in line with consensus. Employment rose by around 50,000 people and the number of unemployed grew by 10,000 people. The participation rate rose to 66.9% from 66.8%.

Pressure in the labour market continues to ease, with forward indicators continuing to soften. That said, job vacancies remain elevated pointing to ongoing resilience in the near-term.

Retail sales for the month of June rose +0.5% m/m vs. +0.2% consensus, and continued the strong growth seen in May of +0.6% m/m.

APRA finalised the targeted reforms to banks' liquidity and capital requirements with the reforms prompted by the US and European banking problems seen last year. APRA confirmed that, as previously proposed, it would require those smaller banks subject to the Minimum Liquidity Holdings (MLH) regulatory regime to adjust the value of their liquid assets regularly to reflect movements in market prices.

Australia and New Zealand Banking Group Ltd (ANZ) completed its acquisition of Australia-based bank Suncorp-Metway Ltd on 31st July 2024. Suncorp-Metway was upgraded by S&P to AA- effective that day.

The Australian dollar fell -2.01%, finishing the month at US64.91 cents (from US66.24 cents the previous month).

### Credit Market

The global credit indices tightened across the board in July. They remain at their levels in early 2022 (prior to the rate hike cycle from most central banks):

| July 2024 | June 2024    |
|-----------|--------------|
| 52bp      | 54bp         |
| 55bp      | 62bp         |
| 65bp      | 71bp         |
|           | 52bp<br>55bp |

# 90 Day Bill Futures

Bill futures fell across the board this month, following the movement in the global bond market.

Source: ASX

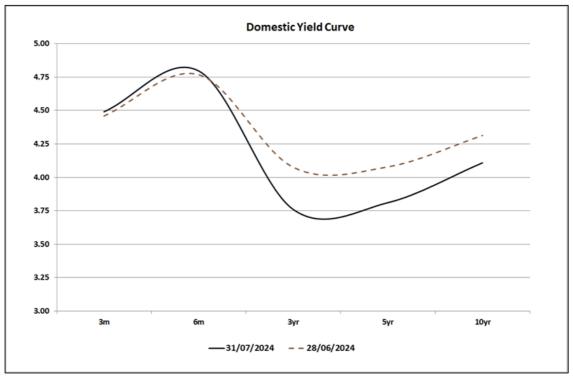

# **Fixed Interest Outlook**

US Fed Chair Powell commented that policy "seems restrictive" but not severely so and believes the neutral rate has "probably risen" from the intercrisis era. He also commented that the Fed is becoming more convinced that inflation is headed back to its 2% target and that the Fed would cut rates before the pace of price increases actually reached that point. The futures market expects the policy rate would be cut 2-3 times this year, down from at least 3-5 reductions earlier this year. The longer-run median US Fed dot plot is currently around 2.80%.

Domestically, as is the case with most central banks at the moment, the RBA is waiting for current economic data to show a clear trend before taking any decisive action. After a softer than expected inflation print on 31<sup>st</sup> July, the RBA will continue to be able to forecast inflation around the midpoint of the target by 2026 and is likely to temper some of the discussion of upside risk to the inflation outlook evident in June. Despite Q2 inflation coming in better than feared, inflation still remains too high, and has shown less progress than the RBA had been expecting. The conditions for a cut remain a long way off, partially due to a tight labour market, whilst gradually cooling, remains resilient.

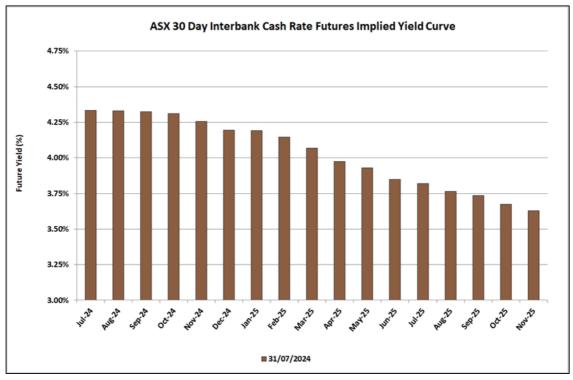

Over the month, longer-term yields fell up to 30bp at the very long end of the curve (remains an inverse yield curve):

Source: ASX, RBA

Arlo Advisory – Monthly Investment Review

The market is now factoring no further rate hikes for the remainder of the calendar year. Financial markets have moved up their expectations of rate cuts, with the first cut pencilled in by the end of Q1 2025.
