  3. Final North Sydney Smart City Action Plan
- 

**SUBJECT:** North Sydney Smart City Strategy - Post Exhibition**AUTHOR:** James Marshall, Economic Development Coordinator**ENDORSED BY:** Joseph Hill, Director City Strategy**EXECUTIVE SUMMARY:**

The *North Sydney Smart City Strategy* sets out the vision, principles and priorities which will guide Council's digital transformation journey from the outset. It is supported by a three-year Action Plan, which includes various actions and performance measures, along with the responsible Council Departments. The Draft Strategy and Action Plan were developed in two stages:

- Stage 1 - preliminary feedback undertaken from December 2018 to February 2019; and
- Stage 2 - preparation of the Draft Strategy and Action Plan and public exhibition, which was exhibited from 25 July 2019 to 21 August 2019.

Eight submissions were received during the exhibition period. In response to the submissions, minor amendments to the Strategy are recommended. There are no changes to the Action Plan.

**FINANCIAL IMPLICATIONS:**

As previously reported, the initiatives proposed in the Action Plan align to existing work plans/budget i.e. the remaining two years of the current Delivery Program. It is intended that the Action Plan be reviewed/updated annually in conjunction with preparation of each Operational Plan and Budget; and that the Strategy be reviewed in conjunction with preparation of the next Delivery Program and Financial Estimates.

**Comment by Responsible Accounting Officer:**

As previously reported, Current funding for the project is appropriate. As the current adopted Delivery Program expires in 2020/21, funding for Year 3 of the Action Plan must be considered as part of preparation of the new Delivery Program.

**RECOMMENDATION:**

1. **THAT** Council notes the submissions received.
  2. **THAT** Council adopts the North Sydney Smart City Strategy and Action Plan.
-

## **LINK TO COMMUNITY STRATEGIC PLAN**

The relationship with the Community Strategic Plan is as follows:

Direction: 3. Our Future Planning

Outcome: 3.3 North Sydney is smart and innovative

## **BACKGROUND**

Embracing innovation and growing the local ecosystem of entrepreneurs and start-ups was identified as a new priority area within the *North Sydney Community Strategic Plan 2018-2028* (adopted June 2018), as identified through stakeholder engagement.

This translated into the inclusion of the following smart city/innovation related ‘strategies’ in the *North Sydney Community Strategic Plan 2018-2028*, under Outcome 3.3, ‘Our Future Planning’:

- 3.3.1 - Develop North Sydney as a knowledge centre in Australia;
- 3.3.2 - Attract and support start-up businesses;
- 3.3.3 - Promote the uptake of broadband, Wi-Fi and digital technologies;
- 3.3.4 - Identify and develop innovations that will establish a competitive advantage for North Sydney;
- 3.3.5 - Celebrate and promote innovation.

The *North Sydney Council Delivery Program 2018/19-2020/21* included project 3.3.1.1 - Develop a Smart City Strategy.

The *North Sydney Smart City Strategy* sets out the vision, principles and priorities which will guide Council’s digital transformation journey from the outset. It is supported by a three-year Action Plan, which includes various actions and performance measures, along with the responsible Council Departments.

The Strategy and Action Plan are based on the following interrelated themes:

1. Smart Travel;
2. Smart Infrastructure;
3. Smart Economy;
4. Smart Leadership;
5. Smart Sustainability; and
6. Smart Community.

At its meeting on 22 July 2019, Council resolved (Min. No. 192):

1. *THAT the Draft North Sydney Smart City Strategy and Action Plan be endorsed for public exhibition;*
  2. *THAT the Draft North Sydney Smart City Strategy and Action Plan be placed on public exhibition for a minimum of 28 days in accordance with the Engagement Strategy; and*
  3. *THAT following exhibition, a report be prepared detailing the outcomes of the exhibition and any recommended amendments.*
-

## **CONSULTATION REQUIREMENTS**

Community engagement is not required.

## **SUSTAINABILITY STATEMENT**

The sustainability implications were considered and reported on during the initiation phase of this project.

## **DETAIL**

The Draft Strategy and Action Plan were developed in two stages. Stage 1 (preliminary feedback) was undertaken from December 2018 to February 2019; and Stage 2 (preparation of the Draft Strategy and Action Plan) involved public exhibition of the Draft Strategy which occurred from 25 July 2019 to 21 August 2019.

Stage 2 promotion/engagement included the following channels:

- an advert in the Mosman Daily (1 August 2019);
- social media, including:
  - Facebook - People Reached: 3,578; Reactions, Comments & Shares: 90; Post Clicks: 142;
  - Instagram - Impressions: 1,000; Reach: 682; Hearts: 21; and
  - Twitter - Impressions: 1,377; Total Engagements: 12.
- the Your Say North Sydney website - Total Visits: 328; Aware Visitors (visited the project page only): 207; Informed Visitors (viewed or downloaded a document): 109; Engaged Visitors: 5 (made a submission online);
- the North Sydney Council website - Clicked a Link: 51;
- an e-newsletter to stakeholders who participated in Stage 1 consultation (Unique Opens: 114; Clicked a Link: 22).

Eight submissions were received during the exhibition period, as summarised in Attachment 1. Overall, the submissions were very positive. The majority of comments related to actions already in the Draft Strategy and Action Plan or to examples of national and international best practice. In some cases, the comments were beyond the scope of the documents.

Regarding Submission No. 2, the comments identify two issues that were not included in the Draft Strategy and Action Plan, namely drones and autonomous vehicles. Advice from Council's consultants, who helped prepare the Strategy, is that these issues represent potential long-term actions for Council, and that they should not be included in the final Strategy and Action Plan. It is noted that Council is in the embryonic stage of becoming a smart city, and that these issues should be parked and can be considered in the next iteration - it is intended that the Strategy be reviewed in conjunction with preparation of the next Delivery Program and Financial Estimates.

As such, it is recommended that the following paragraph is amended under the "Future Proofing" section under "Delivering our Strategy" on page 23 of the Strategy:

---

*Technology, innovation and ideas move at a rapid pace. The role of Council will be to ensure that North Sydney is always ready for the future. Council will monitor the adoption of new and emerging technologies such as drones and automated vehicles, and will devise and continually update frameworks, guidelines and standards to reflect international best practice.*

There are no changes to the Action Plan.

Once adopted, all stakeholders (and submitters) will be notified of the final Strategy and Action Plan and will undertake regular monitoring and evaluation of smart city progress. Periodic updates will be provided, for example in the Annual Report and End of Term Report.

**North Sydney Smart City Strategy - Stage 2  
Summary of submissions received during public exhibition period**

**Prepared August 2019**

The following criteria are used to analyse all submissions received, and to determine whether or not the plan would be amended:

1. The plan **would be** amended if the point:
  - a provided additional information of relevance.
  - b indicated or clarified a change in government legislation, Council's commitment or management policy.
  - c proposed strategies that would better achieve or assist with Council's objectives.
  - d was an alternate viewpoint received on the topic and is considered a better option than that proposed in the Draft Plan or;
  - e indicated omissions, inaccuracies or a lack of clarity.
  
2. The plan **would not be** amended if the point:
  - a addressed issues beyond the scope of the Plan.
  - b was already in the plan or will be considered during the development of a subordinate plan (prepared by Council).
  - c offered an open statement, or no change was sought.
  - d clearly supported the draft proposals.
  - e was an alternate viewpoint received on the topic but the recommendation of the draft plan was still considered the best option.
  - f was based on incorrect information.
  - g contributed options that are not possible (generally due to some aspect of existing legislation or government policy) or; involved details that are not appropriate or necessary for inclusion in a document aimed at providing a strategic community direction over the long term.

**IT IS RECOMMENDED THAT COUNCILLORS REFER TO THE COMPLETE SUBMISSIONS MADE AVAILABLE TO THEM, AND TO THE REPORT TO COUNCIL, WHICH EXPANDS ON THE ISSUES RAISED IN THE SUBMISSIONS.**

# What is a smart city?

---

Embracing new technology will help us improve the way we do things in North Sydney and will be a powerful tool for solving the challenges we face and future-proofing existing systems. Other key aspects of a Smart City involve the collection of data and supporting innovation, which will improve our decision-making and deliver better outcomes for the community.

North Sydney Council has a longstanding reputation for open government, community engagement and being innovative. We will now leverage technology, data and innovation to improve people's experience of North Sydney as a great place to live, work, study and visit.

This Smart City Strategy will ensure we can continue to meet our community's demand for high-quality services which are valued, efficient and cost-effective.

Developed through consultation with community and Council, the Strategy sets out the vision, principles and priorities which will guide the local government area's (LGA) digital transformation, from Cremorne to Wollstonecraft, and from St Leonards to McMahons Point.

The Strategy brings together the work Council has already achieved to date, such as introducing parking sensors, remote-controlled lights and online forms. It also details the steps we must take to be ready for future challenges, including population growth and the changing environment.

The Strategy is supported by a three-year Action Plan, which presents actions and performance measures. The Action Plan acknowledges that North Sydney is in the infancy of its journey to becoming a smart city. In accordance with the Maturity Assessment detailed within the Strategy, implementation of these actions is intended to move us from the 'Beginning' phase to the 'Developing' phase over the next few years.

## STRATEGIC CONTEXT

This Strategy will operate within a broader strategic and policy context, which will shape our direction and growth as a smart city. Key documents and policies are noted below:

	DOCUMENT	OVERVIEW
International		Cities world-wide – both metropolitan and regional – are joining the smart city movement, modernising and leveraging technology and innovation to deal with their unique problems, such as pollution, congestion, environmentally wasteful practices, and ineffective and unsustainable processes and services.
National	<i>Digital Transformation Strategy (2018)</i>	The Digital Transformation Agency’s direction for digital transformation across Australia, with three strategic priorities: Government that is easy to deal with, informed by the community, and fit for the digital age.
	<i>Smart Cities Plan (2016)</i>	The Australian Government’s vision for smart cities and foundations for structural reform is based on the pillars of Smart Investment, Smart Policy and Smart Technology.
State	<i>NSW Innovation Strategy (2016)</i>	The NSW Government’s strategy to strengthen entrepreneurship and develop NSW as the innovation capital of Australia. Includes the creation of a Ministerial Innovation Committee to oversee implementation across four key areas of action: Government as an Innovation Leader; Fostering and Leveraging Research and Development; Skills for the Future; A Home for Entrepreneurs.
	<i>A Metropolis of Three Cities – Greater Sydney Region Plan (2018)</i>	The Greater Sydney Commission’s plan to rebalance growth and deliver its benefits more equally and equitably to residents across Greater Sydney. The plan aligns land use, transport and infrastructure planning to reshape Greater Sydney as three unique but connected cities.
	<i>North District Plan (2018)</i>	20-year plan to manage growth and implement the Greater Sydney Commission’s <i>A Metropolis of Three Cities</i> <ul style="list-style-type: none"> <li>- Grow economic development in the North Sydney CBD</li> <li>- Provide a variety of high quality civic and public spaces befitting a globally-orientated CBD, utilised for a range of cultural and entertainment activities</li> <li>- Provide a regulatory environment that enables economic opportunities created by changing technologies</li> </ul>
Regional	<i>North Sydney Innovation Network (2018)</i>	The North Sydney Innovation Network advocates for technology and innovation policy that improves the inclusivity, sustainability and liveability of the lower North Shore.
	<i>North Sydney Council Community Strategic Plan (2018-2028)</i>	North Sydney’s highest-level plan identifies the community’s main priorities and aspirations for its future and details strategies for achieving them. Outcome 3.3, ‘Our Future Planning’, is a smart and innovative North Sydney: <ul style="list-style-type: none"> <li>- 3.3.1 Develop North Sydney as a knowledge centre in Australia</li> <li>- 3.3.2 Attract and support start-up businesses</li> <li>- 3.3.3 Promote the uptake of broadband, Wi-Fi and digital technologies</li> <li>- 3.3.4 Identify and develop innovations that will establish a competitive advantage for North Sydney</li> <li>- 3.3.5 Celebrate and promote innovation.</li> </ul>

# Engagement summary

---

North Sydney's Smart City engagement program built upon the Innovation-Smart City Focus Group, held in March 2018 as part of the review of the North Sydney Community Strategic Plan.

The Focus Group brought together key stakeholders to develop the aspirational vision for the LGA and encourage industry sector interest and support for the development of North Sydney's Smart City Strategy.

This Strategy has been informed by a two-stage engagement program. The first stage involved a series of stakeholder workshops and online surveys to inform a draft Strategy. Engagement included residents, businesses, educational institutions, local innovators, tech companies, consultants and Council staff. The draft Strategy was publicly exhibited, and feedback invited in the second stage.

## KEY ENGAGEMENT THEMES

### Smart, Sustainable Mobility

- Improving transport intelligence, integration and sustainability
- Making parking more efficient
- Promoting active and innovative transport options

### Environment and Sustainability

- Leveraging technology and data to improve resource management
- Improving the monitoring of environmental assets
- Making the most of our green spaces

### Smart Leadership

- Encouraging smart city leadership across the community
- Building smart city capacity and skills
- Council leading by example

### Public Space Activation

- Increasing our understanding of how space is (and could be) used
- Improving monitoring and management of public space
- Supporting our 'night-time economy'

### Partnerships and Resourcing

- Leveraging our local innovation and technology ecosystem
- Encouraging smart city collaboration and partnerships
- Supporting research, co-design, testing, and learning

### Data Creation and Utilisation

- Increasing data collection, analysis and sharing
- Improving planning and decision-making with better data
- Promoting cyber-security and privacy

# What people said

“

‘Focus on people and local challenges, not technology for the sake of technology.’

‘Smart city developments will drive the growth of future community hotspots and inform how we use community spaces.’

‘We should make technology more accessible for everyone.’

‘Council can lead by example, driving digital transformation and building a culture of innovation.’

‘Rather we should focus on cutting-edge specific needs.’

## COMMUNITY SURVEY RESULTS

said they were **HIGHLY ENGAGED** or **MOSTLY ENGAGED** with smart city and digital technology

### Top strategic priorities

- 1 Smart tech for sustainability
- 2 Maximising the use of public space
- 3 Building our innovation eco-system – supporting innovation in local business

### Top services to be improved

- 1 Transport and parking
- 2 Planning and development
- 3 Energy management

### Top community concerns

- 1 Loss of privacy
- 2 Cyber hacking
- 3 Good user experience

Let's change our viewpoint, from why we can't do things to how we can do things.'

'The new Strategy will provide a shared vision for how we use smart technology to make North Sydney even better.'

'Let's explore emerging technologies and innovative options to improve transport mobility.'

...than be a follower, ...ould be innovative and ...lge, aiming to meet the ...eds of the North Sydney community.'

'We must think about and support community members who find technology daunting.'

'We can be smarter about engaging with risk to encourage innovation.'

'How can we use smart technology and innovation to help activate our CBD, both day and night?'

'Smart tech for better resource management is a really exciting opportunity for North Sydney.'

'The Smart City Strategy can help us improve sustainability and liveability, and build our digital economy.'

**External stakeholders identified North Sydney's strengths as:**

Good team in Council

Ability to attract investment

High number of tech businesses in North Sydney

Local universities and a education institutions

Green spaces

# Smart city maturity framework

Smart city development is a long-term process, requiring ongoing focus, effort and persistence. Moreover, the optimal projects and investments are dependent on relative progress and maturity as a smart city.

To help measure and track our progress, and better target our action program, Council has adopted a comprehensive Smart City Maturity Framework. We will continue to review progress against this Framework, and recalibrate our smart city agenda accordingly, to leverage strengths and address weaknesses. At present, North Sydney is at the “Beginning” stage for each category. The implementation of the actions in the Strategy and Action Plan is intended to move us towards the “Developing” stage over the next three years.

	BEGINNING	DEVELOPING
<b>Leadership and Governance</b>	Ad hoc leadership and basic governance.	Clear smart city leadership and formal governance in place.
<b>Strategy and Policy</b>	Basic smart city plan in place, with limited supporting policies.	Public strategy in place with action plan, and a range of supporting policies.
<b>Smart Regulation and Business Process</b>	Regulation and business processes have minimal consideration for innovation and smart technologies.	Improved regulation and business processes allow for some innovation and smart technologies.
<b>Budgeting and Finance</b>	Budgeting and finance processes do not make use of existing resources.	Budgeting and finance processes coordinate and optimise existing resources
<b>Skills, Culture and Innovation</b>	Limited awareness and responsiveness to digital transformation. Limited smart city skills and experience.	Growing awareness and increased receptiveness to digital transformation. Developing smart city skills and experience, in both depth and breadth.
<b>Community Engagement and Co-Design</b>	Community engagement is minimal and largely unresponsive.	Community engagement is developing, and a broad range of engagement mediums are being employed.
<b>Collaboration and Partnerships (external)</b>	Limited partnerships or collaboration between communities, or between public and private organisations.	Increasing number of councils, firms and industries working together.
<b>Collaboration and Communication (within Council)</b>	Cross-department collaboration and communication is minimal and largely not innovative.	Cross-department collaboration is developing, and the idea of innovation is increasing.
<b>Data Management, Cyber Security and Privacy</b>	Mainly closed data, with limited collection and analysis of data, as well as poor integration with performance management.	Data analysis is increasing, and some data is available, with a data governance framework emerging based on privacy principles and cyber security factors.
<b>Smart Services</b>	Limited availability and low standards of smart services.	Growing availability of smart services and improvements to quality.
<b>Smart Infrastructure</b>	Smart and innovative opportunities are sometimes considered and are applied haphazardly.	Increased consideration and planning of smart and innovative opportunities in infrastructure.

EMBEDDING	LEADING
Active and recognised leadership, with an effective governance framework in place.	Renowned for multi-sector leadership, with agile and innovative governance models in place.
Strategic planning includes robust co-design and prioritisation, with a wide suite of supporting policies.	Strategy and policy are fully integrated into planning and operations, and are recognised as benchmarks.
Regulation and business processes support smart technologies and innovation.	Regulation and business processes encourage smart technologies and innovation.
Budgeting and finance processes support smart technology and innovation. Revenue generating streams are explored.	Budgeting and finance processes encourage smart technology and innovation, as well as revenue generating streams.
Digital transformation is welcomed, and processes are changing to encourage innovation. Broad skills and experience, with a number of identified smart city experts.	Innovative culture, encouraged through frameworks, policies and processes is practiced. Deep smart tech capability on hand, with best practice training systems and programs in place.
Community engagement is broad and well received by the community. The community is interacting with Council digitally and participating in programs and opportunities.	Digital technology is entrenched equitably in community engagement. The community welcomes and actively engages with Council in decision making.
Collaboration is at the centre of innovation in the community and there are numerous partnerships underway.	Universally recognised partnerships between various parties, helping to deliver innovative and creative solutions to community problems.
Cross-department collaboration and communication is broad and considers innovative ideas to solve solutions.	Council-wide collaboration and communication between various departments, assisting in the delivery of innovative solutions.
Most data sets are available and data analysis is common. A solid data governance framework is established on privacy principles and cyber security factors.	Advanced data management and processes, with analytics used to help make decisions, drive innovation and improve outcomes for the community.
Smart services are readily available, frequently used and are of a high quality.	Smart services are state-of-the-art and well-integrated into the community
Smart and innovative opportunities in infrastructure are coordinated and planned with increasing coverage.	Smart and innovative infrastructure is ubiquitous, accessible and extensible.

# Strategy overview

*North Sydney Council will leverage data, technology and innovation, and develop new partnerships, to improve North Sydney as a healthy, active and vibrant place for its community and visitors.*

**OUR VISION**

# Smart city vision and principles

---

North Sydney Council's smart city vision is one of a dynamic and lively place where residents, workers, students and visitors thrive.

People will be at the centre of all decisions, and innovation and technology will be used to improve North Sydney as a place to live, work, study and visit. We will use data to improve decision-making and will develop new partnerships to provide a healthy and sustainable environment.

The following principles will underpin all decisions, actions and partnerships in a smart North Sydney:

## Collaboration

---

Council will encourage participation and collaboration with the community, businesses, investors and other levels of government to maximise service transformation and smart tech opportunities and outcomes.

## Security and Privacy

---

Council will ensure the safety and security of people and assets and maintain high standards of privacy in leveraging the value of data.

## Innovation

---

Council will support and encourage local innovation, which will strengthen our local economy, create new digital assets and generate new revenue streams to benefit the people of North Sydney.

## Sustainability

---

Council will harness technology and data to promote sustainability. We will strive towards economic, environmental, governance and social outcomes.

## Inclusive and Accessible

---

Council will provide user-friendly solutions and build the community's digital capacity so that everyone can share the benefits of smart technology and innovation.

# Strategic themes and priority actions

Six strategic themes have been identified to guide our smart city development. Each strategic theme identifies a number of objectives and actions in alignment with our vision and principles.

## SMART TRAVEL

### SUPPORTING SMARTER TRAVEL CHOICES

North Sydney will use technology, data and innovation to promote the community’s vision for transport: *“Transport will play a positive role in supporting a happy, healthy and prosperous North Sydney community.”* (North Sydney Transport Strategy 2017).

#### Key challenges and opportunities

- Significant numbers of private motor vehicles
- High demand for on-street parking
- Sydney Metro will connect Sydney’s north-western suburbs to the Bankstown Line via Chatswood, Crows Nest, North Sydney and the Sydney CBD

#### Achievements to date

- Car sharing:** provision of 120+ on-street spaces
- Parking management:** parking sensors which detect vehicle presence and report data to on-street parking meters
- Ticketless parking:** automatic reading of vehicle registration plates in carparks to create greater efficiency at payment
- Parkmobile:** app for processing on-street parking payments
- Ernest Street cycleway:** permanent counter installed to capture each trip made by bike

OBJECTIVES	ACTIONS
<p><b>Improve the experience and efficiency of travel in North Sydney</b></p>	<ul style="list-style-type: none"> <li>- Install dynamic parking signs at Council owned carparks, reporting live parking availability</li> <li>- Provide open access to live parking data, and explore options for apps</li> <li>- Support the development/delivery of on-line journey planning tools and apps by sharing relevant data</li> </ul>
<p><b>Increase up-take of low emission transport options</b></p>	<ul style="list-style-type: none"> <li>- Prepare an Electric Vehicle (EV) Policy to coordinate Council action (accounting for planning, promotion, infrastructure, services, etc.)</li> <li>- Explore options to install EV charging stations in Council owned car parks and other infrastructure</li> </ul>
<p><b>Improve our understanding of transport in North Sydney</b></p>	<ul style="list-style-type: none"> <li>- Expand use of counters on cycleways</li> <li>- Monitor and analyse transport data to inform future transport planning and pricing</li> </ul>

**SMART INFRASTRUCTURE**

**CREATING VIBRANT AND LIVEABLE PLACES**

North Sydney will leverage smart technology to develop vibrant spaces, to promote social inclusion and to enhance connectivity within the community.

**Key challenges and opportunities**

- Growing and changing population
- Ageing infrastructure
- Growing community expectations regarding the use of technology

**Achievements to date**

**Electronic lodgement of development applications:** software options explored to reduce the level of paper surrounding the assessment process and deliver determinations electronically

**Multi-Function Poles:** Remote operation and control of public lighting network by Council, including automated reports of lighting problems

**North Sydney CBD Public Domain Strategy Stage 1:** identifies the need for wayfinding information pylons, including public transport updates, mapping and emergency services

**OBJECTIVES**

**ACTIONS**

**Modernise planning and building compliance processes and tools to better leverage digital technology**

- Review planning policies and standard conditions of development consent to promote the incorporation of smart city initiatives
- Implement electronic lodgement system for development applications
- Review current planning and building compliance processes/systems, identifying the top digital reforms e.g. 3D modelling for CBD based development, and aerial mapping

**Enhance our public places with smart technology**

- Seek expressions of interest for the provision of smart street infrastructure, e.g. wayfinding information pylons, community noticeboards, and free public Wi-Fi
- Install smart street infrastructure, e.g. wayfinding information pylons, community noticeboards, and free public Wi-Fi
- Explore options to better manage and maintain infrastructure

**Improve our understanding of the use of public places in North Sydney**

- Explore options to install sensors to measure people movement and use of public places
- Monitor and analyse public place data to inform future infrastructure planning

**SMART ECONOMY**

**DRIVING OPPORTUNITY AND PRODUCTIVITY**

North Sydney will continue to develop its smart economy to provide new opportunities for local business, generate new revenue, and increase economic prosperity.

**Key challenges and opportunities**

- North Sydney CBD is a thriving office market but has lost some competitiveness to Macquarie Park
- St Leonards is a health and education precinct and Planned Precinct
- Sydney Metro will connect North Sydney with new markets and lead to new over-station development in the North Sydney CBD and Crows Nest

**Achievements to date**

**100 Christie Street, St Leonards:** Council has negotiated a voluntary planning agreement (VPA) for the provision of two floors of commercial space for a co-working space within a future building on the site

**Ward Street Masterplan:** includes a proposal for a 4,750m<sup>2</sup> Council-owned multifunctional cultural hub with Wi-Fi, tech-enabled meeting rooms, performance spaces, screening rooms, space for using tech and innovation for talks and workshops

**Data Buzz:** annual business event, held in conjunction with Small Business Month and Spark Fest, to showcase the North Sydney innovation sector and encourage innovation in small businesses

**OBJECTIVES**

**ACTIONS**

**Increase local innovation capacity and activity**

- Undertake an audit of local start-ups and co-working spaces
- Support local start-ups and co-working spaces
- Implement the outcomes of the VPA at 100 Christie Street for a co-working space
- Progress the cultural hub as part of the Ward Street Masterplan

**Build our digital/knowledge economy**

- Prepare North Sydney Smart City Profile Plan to guide promotion, positioning and partnerships into the future

**Develop our night time and visitor economies**

- Prepare Smart City Night Time Economy Discussion Paper, to explore challenges and smart tech options for enhancing the night time economy
- Test and trial Smart City Night Time Economy options e.g. digital activations
- Investigate digital options to promote North Sydney LGA to key visitor markets

**SMART LEADERSHIP**

**BUILDING DIGITAL MATURITY**

Council will design and develop a better city for our community by setting an example and spearheading digital transformation internally. We will improve our capacity to deliver better services, promote innovation and build upon our strengths to drive smart city outcomes.

**Key challenges and opportunities**

- Growing community expectations regarding the use of technology
- Changing legislation and regulations, including the Payment Card Industry Data Security Standard
- Opportunities to share data to address a range of challenges

**Achievements to date**

- Council Meetings Webcast:** live, on-demand video and audio of Council meetings
- Online Forms:** secure payment and submission of forms online
- Information Asset Register:** register developed to identify and manage risks to Council’s information assets

OBJECTIVES	ACTIONS
<b>Increase the capacity of Council to deliver smart city projects</b>	<ul style="list-style-type: none"> <li>- Deliver smart city awareness and training for staff</li> <li>- Integrate smart city and innovation opportunities and projects into Council's Workforce Management Strategy (part of Resourcing Strategy)</li> </ul>
<b>Improve innovation capability and outcomes</b>	<ul style="list-style-type: none"> <li>- Review the Information Communication and Technology Strategy</li> <li>- Migrate Council's data centre</li> <li>- Explore open platform options for Council's website</li> <li>- Ongoing review of Council's Information Security Architecture to enhance cyber security provisions</li> <li>- Prepare a Data Sharing Policy to improve data collection, sharing, analysis and decision making across Council</li> <li>- Collaborate with universities and other industry and government stakeholders to provide open data for local hackathon and app building events/programs</li> </ul>
<b>Use smart technology to improve Council services</b>	<ul style="list-style-type: none"> <li>- Continue the roll out of online forms</li> <li>- Increase use of online tools and digital media e.g. info graphics, animations, video, audio and interactive webpages for exploring plans/reports on Council's website and social media posts</li> </ul>

**SMART SUSTAINABILITY**

**SAFEGUARDING OUR FUTURE**

North Sydney is committed to safeguarding our environment and our future. We will leverage technology to help us better understand and improve our waste, water and energy management practices.

**Key challenges and opportunities**

- Potential impact of changes to our climate
- Increasing demand for resources, especially water and energy, and diminishing capacity to send waste to landfill sites
- Opportunities to collaborate with partners to address environmental challenges

**Achievements to date**

**Coal Loader Centre for Sustainability:** encompassing the Platform, includes free public Wi-Fi, people counters, mobile phone charging stations, sensors monitoring use of water, gas and electricity, solar photovoltaic electricity generation, app-controlled lighting

**Breathing wall:** Mitchell St Plaza, St Leonards is the world's first application of technology which filters polluted air from vehicle exhaust and other pollutants, with ongoing air quality testing and data collection by UTS

**Remote Controlled Irrigation and Lighting in Parks:** centralised control irrigation and optimised water use and lighting for all sports fields and selected parks

**Smart Building Management System:** controls air conditioning and can control electricity use at the Council Chambers, Stanton Library and North Sydney Olympic Pool

**Solar Photovoltaics:** solar panels generate free electricity at various Council sites

OBJECTIVES	ACTIONS
<p><b>Improve our understanding of environmental management and sustainability</b></p>	<ul style="list-style-type: none"> <li>- Identify opportunities for accelerating smart technology solutions for better energy/environmental management in the LGA</li> <li>- Prepare Sustainability Action Plan, including smart technology solutions</li> <li>- Enhance open spaces with smart technology, including the Coal Loader Centre for Sustainability</li> <li>- Monitor and analyse environmental data to inform future planning</li> </ul>
<p><b>Improve energy and water management in North Sydney</b></p>	<ul style="list-style-type: none"> <li>- Collaborate with utilities to promote smart metering for North Sydney</li> <li>- Continue roll out of solar photovoltaics, including a car port system at Holtermann Street Car Park</li> </ul>
<p><b>Improve waste management in North Sydney</b></p>	<ul style="list-style-type: none"> <li>- Prepare smart waste options paper for Council's consideration</li> <li>- Explore options to facilitate the re-use, recycling and repair of products and materials within the community</li> <li>- Deliver priority smart waste projects</li> </ul>

**SMART COMMUNITY**

**INCLUSIVE, CONNECTED AND ENGAGED**

North Sydney will develop our community’s digital skills and foster innovation throughout the community. We will develop a culture of collaboration and empower our community to participate.

**Key challenges and opportunities**

- Growing and changing population
- Engaging with the community regarding the future delivery of Council services
- Opportunities for the community to connect with each other and pursue healthier lifestyles

**Achievements to date**

- Online engagement:** Council’s dedicated ‘yoursay’ website has increased participation by use of a range of tools allowing different levels of engagement
- Stanton Library:** electronic self-checkouts and returns, free public Wi-Fi, eResources
- Public Art Trail App:** digital walking tour for public art in North Sydney
- 617-621 Pacific Highway:** Council has negotiated a VPA for the dedication to Council of two fitted-out floors for a contemporary Arts Centre, within a future building on the site, featuring digital art

**OBJECTIVES**

**ACTIONS**

**Use smart technology to engage the community in Council’s decision making**

- Explore emerging smart engagement tools as opportunities arise (per project specific engagement needs)
- Recommence online engagement panels program (VoiceBox)

**Improve the community’s digital literacy**

- Continue to promote awareness of Stanton Library’s technology based services, including free Wi-Fi, databases, e-resources and digital collection access
- Stanton Library to deliver digital inclusion program to provide technology training and assistance to seniors

**Encourage participation in community programs**

- Develop Stanton Library Mobile App to allow members to search the catalogue, renew items, and other functions
- Develop public programs for all ages that support lifelong learning in STEAM and promote ideas and innovation e.g. Shorelink mobile makerspace, Live Science Engagement Talks, coding/robotics workshops, digital content creation and creative programs
- Implement the outcomes of the VPA at 617-621 Pacific Highway for a contemporary arts centre

# Delivering our strategy

North Sydney is on its way to becoming a leading smart city. This Smart City Strategy sets the direction for North Sydney's growth as a smart city, providing a clear vision for North Sydney's future and how it intends to get there.

## IMPLEMENTATION

Delivery of the actions within this Strategy requires a cross-Council approach. Some actions will be quick wins and others are small steps as part of broader initiatives. To drive successful outcomes and lead North Sydney into the future, Council's approach to smart city delivery will involve the following components related to internal operational and organisational processes, governance and culture.

### Promotion and Awareness

Council will promote the Strategy both internally and externally. We will provide progress updates to the Council and to the community, including through North Sydney News (community newsletter), e-newsletters and social media.

### Finance and Budgeting

Council will develop strong business cases and innovative financing models. To ensure that smart city projects are financially sustainable and provide economic benefit to the North Sydney community, Council will look for ways to create digital assets and generate revenue streams from them.

### Evaluating and Reporting on Performance

Council will undertake regular monitoring and evaluation of smart city progress in accordance with the actions and performance measures articulated in the Action Plan, to be updated annually. Progress will be periodically tracked, assessed and reported, for example in the Annual Report and End of Term Report.

## Community Engagement

Council will build on its community engagement achievements and will empower the community to engage in the decision-making process. Council will leverage digital technology and online tools, and will host co-design and collaborative events to ensure community input.

## Collaboration and Partnerships

Although Council is responsible for delivering the majority of the actions in the Strategy, some actions will be delivered in partnership with other stakeholders. Council will work closely with the community, local businesses, innovators, researchers and developers to realise North Sydney's ambition and potential in the smart city sphere. We will coordinate collaboration so that together we can put this Strategy into action and drive smart city progress.

## Future-Proofing

Technology, innovation and ideas move at a rapid pace. The role of Council will be to ensure that North Sydney is always ready for the future. Council will monitor the adoption of new and emerging technologies such as drones and automated vehicles, and will devise and continually update frameworks, guidelines and standards to reflect international best practice.

## Data Management

The effective collection and utilisation of data are fundamental components of the smart city. Data helps us gain new insights and better understand practices so that we can develop innovative solutions to our challenges and improve the way we do things. Council will establish clear and dynamic data management frameworks to ensure that the value of data is used to benefit the community, while upholding high standards of privacy, confidentiality and security.

## Smart Policy and Regulation

Smart policy and modern regulation will be the backbone of smart city progress in North Sydney. Organisational reform, smart city guidelines and frameworks, and red tape reduction will drive action by accelerating the deployment of technology and transformation of services and by catalysing new opportunities for partnership, investment and innovation.

## MEASURING MATURITY

Council will continue to track our maturity against our Smart City Maturity Framework, to confirm we have the structures and capacity to successfully deliver North Sydney's smart city vision.

## UPDATING THE STRATEGY

Our Strategy will remain flexible and dynamic. Council will monitor local sustainability indicators, including economic, environmental, governance and social data. We will continue to learn from the successes and mistakes of cities worldwide. We will update and adapt this Strategy and our aligned Action Plan to ensure we are delivering successful outcomes for our community.

# Introduction

The North Sydney Smart City Strategy outlines key objectives and pathways for North Sydney to leverage smart technology, data and innovation to become an even better Local Government Area (LGA).

The Strategy is supported by this Smart City Action Plan, which presents actions and performance measures. The Action Plan acknowledges that North Sydney is in the infancy of its journey to becoming a smart city. In accordance with the Maturity Assessment detailed within the Strategy, implementation of these actions is intended to move us from the 'Beginning' phase to the 'Developing' phase. The Action Plan focuses on the next three years (2019/20 to 2021/22). Council will review and update this Action Plan annually as part of the broader planning and budget process.

Monitoring reports will be prepared biannually to track implementation, including traffic light reporting against the actions and indicator measurement.

# Governance Structure

The Governance structure for North Sydney's Smart City Strategy is shown in the diagram below.

Roles and responsibilities within this governance framework include:

- ▶ Council
  - Leadership, direction setting, overall budget allocation, oversight
- ▶ Executive (Senior Management or MANEX)
  - Strategy director/coordinator, leadership/culture, policy, and reporting
- ▶ Smart City PCG
  - Coordination, oversight, partnerships, business case development, communications, collaboration across Council, and advice to Executive and staff
- ▶ Departments (within Council)
  - Implementation, reporting, evaluation
- ▶ External partners (e.g. vendors, researchers, other governments):
  - Delivery, opportunity assessments, knowledge-sharing and local eco-system growth

## Schedule of Action

Key actions and performance measures for the forthcoming the period 2019/20 to 2021/22 are presented in the schedule below. Actions are aligned with the Strategic Themes and Priority Action Areas within the Smart City Strategy.

Strategic Theme	Objectives	Actions	Performance Measures	Responsible Department	Year
Smart Travel	Improve the experience and efficiency of travel in North Sydney	Install dynamic parking signs at Council owned car parks, reporting live parking availability	<ul style="list-style-type: none"> <li>▶ Number of Council car parks with dynamic parking signs</li> </ul>	▶ Works Engineering	▶ 2019/20
Smart Travel	Improve the experience and efficiency of travel in North Sydney	Provide open access to live parking data, and explore options for app(s)	<ul style="list-style-type: none"> <li>▶ Live data access provided</li> <li>▶ Number of parking apps developed</li> <li>▶ Number of parking data users</li> </ul>	▶ Traffic & Transport Operations/Works Engineering	▶ 2021/22
Smart Travel	Improve the experience and efficiency of travel in North Sydney	Support the development/delivery of on-line journey planning tools and apps by sharing relevant data	<ul style="list-style-type: none"> <li>▶ Number of transport datasets published</li> <li>▶ Number of transport data users</li> </ul>	▶ Strategic Planning/Traffic & Transport Operations	▶ 2021/22
Smart Travel	Increase up-take of low emission transport options	Prepare an Electric Vehicle (EV) Policy to coordinate Council action (accounting for planning, promotion, infrastructure, services, etc.)	<ul style="list-style-type: none"> <li>▶ EV Policy adopted</li> </ul>	▶ Strategic Planning/Traffic & Transport Operations/ Works Engineering	▶ 2019/20
Smart Travel	Increase up-take of low emission transport options	Explore options to install EV charging stations in Council owned car parks and other infrastructure	<ul style="list-style-type: none"> <li>▶ Number of EV charging stations installed</li> <li>▶ Number of people using the supplied EV charging stations</li> </ul>	▶ Traffic & Transport Operations/Works Engineering	▶ 2019/20

Strategic Theme	Objectives	Actions	Performance Measures	Responsible Department	Year
Smart Travel	Improve our understanding of transport in North Sydney	Expand use of cycleways counters	<ul style="list-style-type: none"> <li>▶ Number of cycleways with counters installed</li> <li>▶ Number of cycleway datasets published</li> </ul>	▶ Traffic & Transport Operations	▶ 2021/22
Smart Travel	Improve our understanding of transport in North Sydney	Monitor and analyse transport data to inform future transport planning and pricing	▶ Number of Council strategies and plans incorporating transport data	▶ Strategic Planning/Traffic & Transport Operations	<ul style="list-style-type: none"> <li>▶ 2019/20</li> <li>▶ 2020/21</li> <li>▶ 2021/22</li> </ul>
Smart Infrastructure	Modernise planning and building compliance processes and tools to better leverage digital technology	Review planning policies and standard conditions of development consent to promote the incorporation of smart city initiatives	▶ Revised planning policies and/or standard conditions of development consent incorporating smart city initiatives adopted	▶ Development Services/Strategic Planning	▶ 2019/20
Smart Infrastructure	Modernise planning and building compliance processes and tools to better leverage digital technology	Implement electronic lodgement system for development applications	▶ Electronic lodgement system for development applications implemented	▶ Administration Services/Development Services/Information Technology	▶ 2019/20
Smart Infrastructure	Modernise planning and building compliance processes and tools to better leverage digital technology	Review current planning and building compliance processes/systems, identifying the top digital reforms e.g. 3D modelling for CBD based development, aerial mapping, etc.	▶ Number of smart planning and building compliance tools adopted	▶ Development Services/Environment & Building Compliance/Strategic Planning	<ul style="list-style-type: none"> <li>▶ 2020/21</li> <li>▶ 2021/22</li> </ul>
Smart Infrastructure	Enhance our public places with smart technology	Seek expressions of interest for the provision of smart street infrastructure, e.g. wayfinding information pylons, community noticeboards, and free public Wi-Fi	▶ Number of expressions of interest received	▶ Engineering Infrastructure/Landscape Planning & Design/Strategic Planning	▶ 2019/20

Strategic Theme	Objectives	Actions	Performance Measures	Responsible Department	Year
Smart Infrastructure	Enhance our public places with smart technology	Install smart street infrastructure, e.g. wayfinding information pylons, community noticeboards, and free public Wi-Fi	<ul style="list-style-type: none"> <li>▶ Contract for the provision of smart street infrastructure completed</li> </ul>	<ul style="list-style-type: none"> <li>▶ Engineering Infrastructure/ Environmental Services/ Landscape Planning &amp; Design/Strategic Planning</li> </ul>	<ul style="list-style-type: none"> <li>▶ 2020/21</li> <li>▶ 2021/22</li> </ul>
Smart Infrastructure	Enhance our public places with smart technology	Explore options to better manage and maintain infrastructure	<ul style="list-style-type: none"> <li>▶ Recommended approach to smart infrastructure monitoring tools adopted</li> </ul>	<ul style="list-style-type: none"> <li>▶ Engineering Infrastructure/ Environmental Services/ Landscape Planning &amp; Design</li> </ul>	<ul style="list-style-type: none"> <li>▶ 2021/22</li> </ul>
Smart Infrastructure	Improve our understanding of the use of public places in North Sydney	Explore options to install sensors to measure people movement and use of public places	<ul style="list-style-type: none"> <li>▶ Recommended approach to provision of people sensors adopted</li> </ul>	<ul style="list-style-type: none"> <li>▶ Engineering Infrastructure/ Environmental Services/ Landscape Planning &amp; Design/Strategic Planning</li> </ul>	<ul style="list-style-type: none"> <li>▶ 2021/22</li> </ul>
Smart Infrastructure	Improve our understanding of the use of public places in North Sydney	Monitor and analyse public place data to inform future infrastructure planning	<ul style="list-style-type: none"> <li>▶ Number of Council strategies and plans incorporating public place data</li> </ul>	<ul style="list-style-type: none"> <li>▶ Engineering Infrastructure/ Environmental Services/ Landscape Planning &amp; Design/Strategic Planning</li> </ul>	<ul style="list-style-type: none"> <li>▶ 2019/20</li> <li>▶ 2020/21</li> <li>▶ 2021/22</li> </ul>
Smart Economy	Increase local innovation capacity and activity	Undertake audit of local start-ups and co-working spaces	<ul style="list-style-type: none"> <li>▶ Audit of local start-ups completed with recommendations for future action (if any)</li> </ul>	<ul style="list-style-type: none"> <li>▶ Integrated Planning &amp; Special Projects</li> </ul>	<ul style="list-style-type: none"> <li>▶ 2019/20</li> </ul>
Smart Economy	Increase local innovation capacity and activity	Support local start-ups and co-working spaces	<ul style="list-style-type: none"> <li>▶ Joint project undertaken with NSW Government to support local start-ups and co-working spaces</li> </ul>	<ul style="list-style-type: none"> <li>▶ Integrated Planning &amp; Special Projects</li> </ul>	<ul style="list-style-type: none"> <li>▶ 2020/21</li> <li>▶ 2021/22</li> </ul>
Smart Economy	Increase local innovation capacity and activity	Implement the outcomes of the VPA at 100 Christie Street for a co-working space	<ul style="list-style-type: none"> <li>▶ VPA at 100 Christie Street approved</li> <li>▶ Approval granted for the construction of the co-working space</li> </ul>	<ul style="list-style-type: none"> <li>▶ Development Services/ Strategic Planning</li> </ul>	<ul style="list-style-type: none"> <li>▶ 2019/20</li> <li>▶ 2020/21</li> <li>▶ 2021/22</li> </ul>

Strategic Theme	Objectives	Actions	Performance Measures	Responsible Department	Year
Smart Economy	Increase local innovation capacity and activity	Progress the cultural hub as part of the Ward Street Masterplan	▶ Proposal for cultural hub at Ward Street approved	▶ Strategic Planning	▶ 2019/20 ▶ 2020/21 ▶ 2021/22
Smart Economy	Build our digital/knowledge economy	Prepare <i>North Sydney Smart City Profile Plan</i> to guide promotion, positioning and partnerships into the future	▶ Smart City Profile Plan prepared	▶ Communications & Events/ Integrated Planning & Special Projects	▶ 2020/21
Smart Economy	Develop our night time and visitor economies	Prepare <i>Smart City Night Time Economy Discussion Paper</i> , to explore challenges and smart tech options for enhancing the night time economy	▶ <i>Smart City Night Time Economy Discussion Paper</i> prepared with recommendations for future action (if any)	▶ Communications & Events/Community Development/Integrated Planning & Special Projects/ Strategic Planning	▶ 2020/21
Smart Economy	Develop our night time and visitor economies	Test and trial <i>Smart City Night Time Economy</i> options e.g. digital activations	▶ Number of <i>Smart City Night Time Economy options</i> trialed	▶ Communications & Events/Community Development/Integrated Planning & Special Projects/Strategic Planning	▶ 2021/22
Smart Economy	Develop our night time and visitor economies	Investigate digital options to promote North Sydney LGA to key visitor markets	▶ Number of digital options promoting tourism	▶ Communications & Events/Integrated Planning & Special Projects	▶ 2020/21 ▶ 2021/22
Smart Leadership	Increase the capacity of Council to deliver smart city projects	Undertake smart city awareness and training for staff	▶ Smart city training programs/ options paper prepared	▶ Integrated Planning & Special Projects/Workforce Planning	▶ 2019/20 ▶ 2020/21 ▶ 2021/22
Smart Leadership	Increase the capacity of Council to deliver smart city projects	Integrate smart city and innovation opportunities and projects into Council's Workforce Management Strategy (part of Resourcing Strategy)	▶ Smart City Workforce Planning Options Report submitted to Council	▶ Integrated Planning & Special Projects/Workforce Planning	▶ 2021/22
Smart Leadership	Improve innovation capability and outcomes	Review the Information Communication and Technology Strategy	▶ Information Communication and Technology Strategy adopted	▶ Information Technology	▶ 2019/20

Strategic Theme	Objectives	Actions	Performance Measures	Responsible Department	Year
Smart Leadership	Improve innovation capability and outcomes	Migrate Council's data centre	▶ New data centre operational	▶ Information Technology	▶ 2019/20
Smart Leadership	Improve innovation capability and outcomes	Explore open platform options for Council's website	▶ Brief for new website prepared	▶ Information Technology	▶ 2019/20
Smart Leadership	Improve innovation capability and outcomes	Ongoing review of Council's Information Security Architecture to enhance cyber security provisions	▶ Alignment with Council's business objectives	▶ Risk	▶ 2019/20 ▶ 2020/21 ▶ 2021/22
Smart Leadership	Improve innovation capability and outcomes	Prepare a Data Sharing Policy to improve data collection, sharing, analysis and decision making across Council	▶ Data Sharing Policy adopted ▶ Data Sharing Program developed (to guide Policy implementation)	▶ Document Management Services/Information Technology/Integrated Planning & Special Projects	▶ 2019/20
Smart Leadership	Improve innovation capability and outcomes	Collaborate with universities and other industry and government stakeholders to provide open data for local hackathon and app building events/programs	▶ Number of events/programs participated in	▶ Information Technology/Integrated Planning & Special Projects	▶ 2020/21 ▶ 2021/22
Smart Leadership	Use smart technology to improve Council services	Continue the roll out of online forms	▶ Number of online forms developed	▶ Customer Services/Information Technology	▶ 2019/20 ▶ 2020/21 ▶ 2021/22
Smart Leadership	Use smart technology to improve Council services	Increase use of online tools and digital media e.g. info graphics, animations, video, audio and interactive webpages for exploring plans/reports on Council's website and social media posts	▶ Number of new tools utilised	▶ Communications & Events/Integrated Planning & Special Projects	▶ 2019/20 ▶ 2020/21 ▶ 2021/22

Strategic Theme	Objectives	Actions	Performance Measures	Responsible Department	Year
Smart Sustainability	Improve our understanding of environmental management and sustainability	Identify opportunities for accelerating smart technology solutions for better energy/environmental management in the LGA	▶ Smart Sustainability Report submitted to Council with key insights and recommendations	▶ Environmental Services	▶ 2019/20
Smart Sustainability	Improve our understanding of environmental management and sustainability	Prepare Sustainability Action Plan, including smart technology solutions	▶ Sustainability Action Plan completed	▶ Environmental Services	▶ 2019/20
Smart Sustainability	Improve our understanding of environmental management and sustainability	Enhance open spaces with smart technology, including the Coal Loader Centre for Sustainability	▶ Number of recommendations from <i>Coal Loader Living Lab Workshop Report</i> implemented	▶ Environmental Services/Landscape Planning & Design	▶ 2019/20 ▶ 2020/21 ▶ 2021/22
Smart Sustainability	Improve our understanding of environmental management and sustainability	Monitor and analyse environmental data to inform future planning	▶ Number of Council strategies and plans incorporating environmental data	▶ Environmental Services/Landscape Planning & Design	▶ 2019/20 ▶ 2020/21 ▶ 2021/22
Smart Sustainability	Improve energy and water management in North Sydney	Collaborate with utilities to promote smart metering for North Sydney	▶ Utilities Smart Metering Communications Plan completed	▶ Environmental Services	▶ 2021/22
Smart Sustainability	Improve energy and water management in North Sydney	Continue roll out of solar photovoltaics, including a car port system at Holtermann Street Car Park	▶ Number of Council facilities with solar photovoltaics installed	▶ Environmental Services/Landscape Planning & Design	▶ 2019/20 ▶ 2020/21 ▶ 2021/22
Smart Sustainability	Improve waste management in North Sydney	Prepare <i>Smart Waste Options Paper</i> for Council's consideration	▶ Smart Waste Options Paper prepared	▶ Environmental Services	▶ 2020/21

Strategic Theme	Objectives	Actions	Performance Measures	Responsible Department	Year
Smart Sustainability	Improve waste management in North Sydney	Explore options to facilitate the re-use, recycling and repair of products and materials with the community	Circular Economy Plan prepared	► Environmental Services	► 2020/21
Smart Sustainability	Improve waste management in North Sydney	Deliver priority smart waste projects	► Number of smart waste projects delivered	► Environmental Services	► 2021/22
Smart Community	Use smart technology to engage the community in Council's decision making	Explore emerging smart engagement tools as opportunities arise (per project specific engagement needs)	► Number of new tools utilised for engagements	► Integrated Planning & Special Projects	► 2019/20 ► 2020/21 ► 2021/22
Smart Community	Use smart technology to engage the community in Council's decision making	Recommence online engagement panels program (VoiceBox)	► Number of members per panel	► Integrated Planning & Special Projects	► 2021/22
Smart Community	Improve the community's digital literacy	Continue to promote awareness of Stanton Library's technology based services, including free Wi-Fi, databases, e-resources and digital collection access	► Stanton Library's technology based services promoted via Council's website e-newsletters	► Library Services	► 2019/20 ► 2020/21 ► 2021/22
Smart Community	Improve the community's digital literacy	Stanton Library to deliver digital inclusion program to provide technology training and assistance to seniors	► Number of residents participating in digital inclusion program	► Library Services	► 2019/20 ► 2020/21 ► 2021/22
Smart Community	Encourage participation in community programs	Develop Stanton Library Mobile App to allow members to search the catalogue, renew items, and other functions	► Stanton Library Mobile App developed ► Number of Stanton Library Mobile App users	► Library Services	► 2019/20

Strategic Theme	Objectives	Actions	Performance Measures	Responsible Department	Year
Smart Community	Encourage participation in community programs	Develop public programs for all ages that support lifelong learning in STEAM and promote ideas and innovation e.g. Shorelink mobile makerspace, Live Science Engagement Talks, coding/robotics workshops, digital content creation and creative programs	<ul style="list-style-type: none"> <li>▶ Number of programs delivered</li> <li>▶ Number of participants</li> </ul>	▶ Library Services	<ul style="list-style-type: none"> <li>▶ 2019/20</li> <li>▶ 2020/21</li> <li>▶ 2021/22</li> </ul>
Smart Community	Encourage participation in community programs	Implement the outcomes of the VPA at 617-621 Pacific Highway for a contemporary arts centre	▶ Approval granted for the construction of the contemporary arts centre	▶ Community Development/Development Services/Strategic Planning	<ul style="list-style-type: none"> <li>▶ 2019/20</li> <li>▶ 2020/21</li> <li>▶ 2021/22</li> </ul>
